

Polynomial | intrinsic dimension = 3  
Averaged zero occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

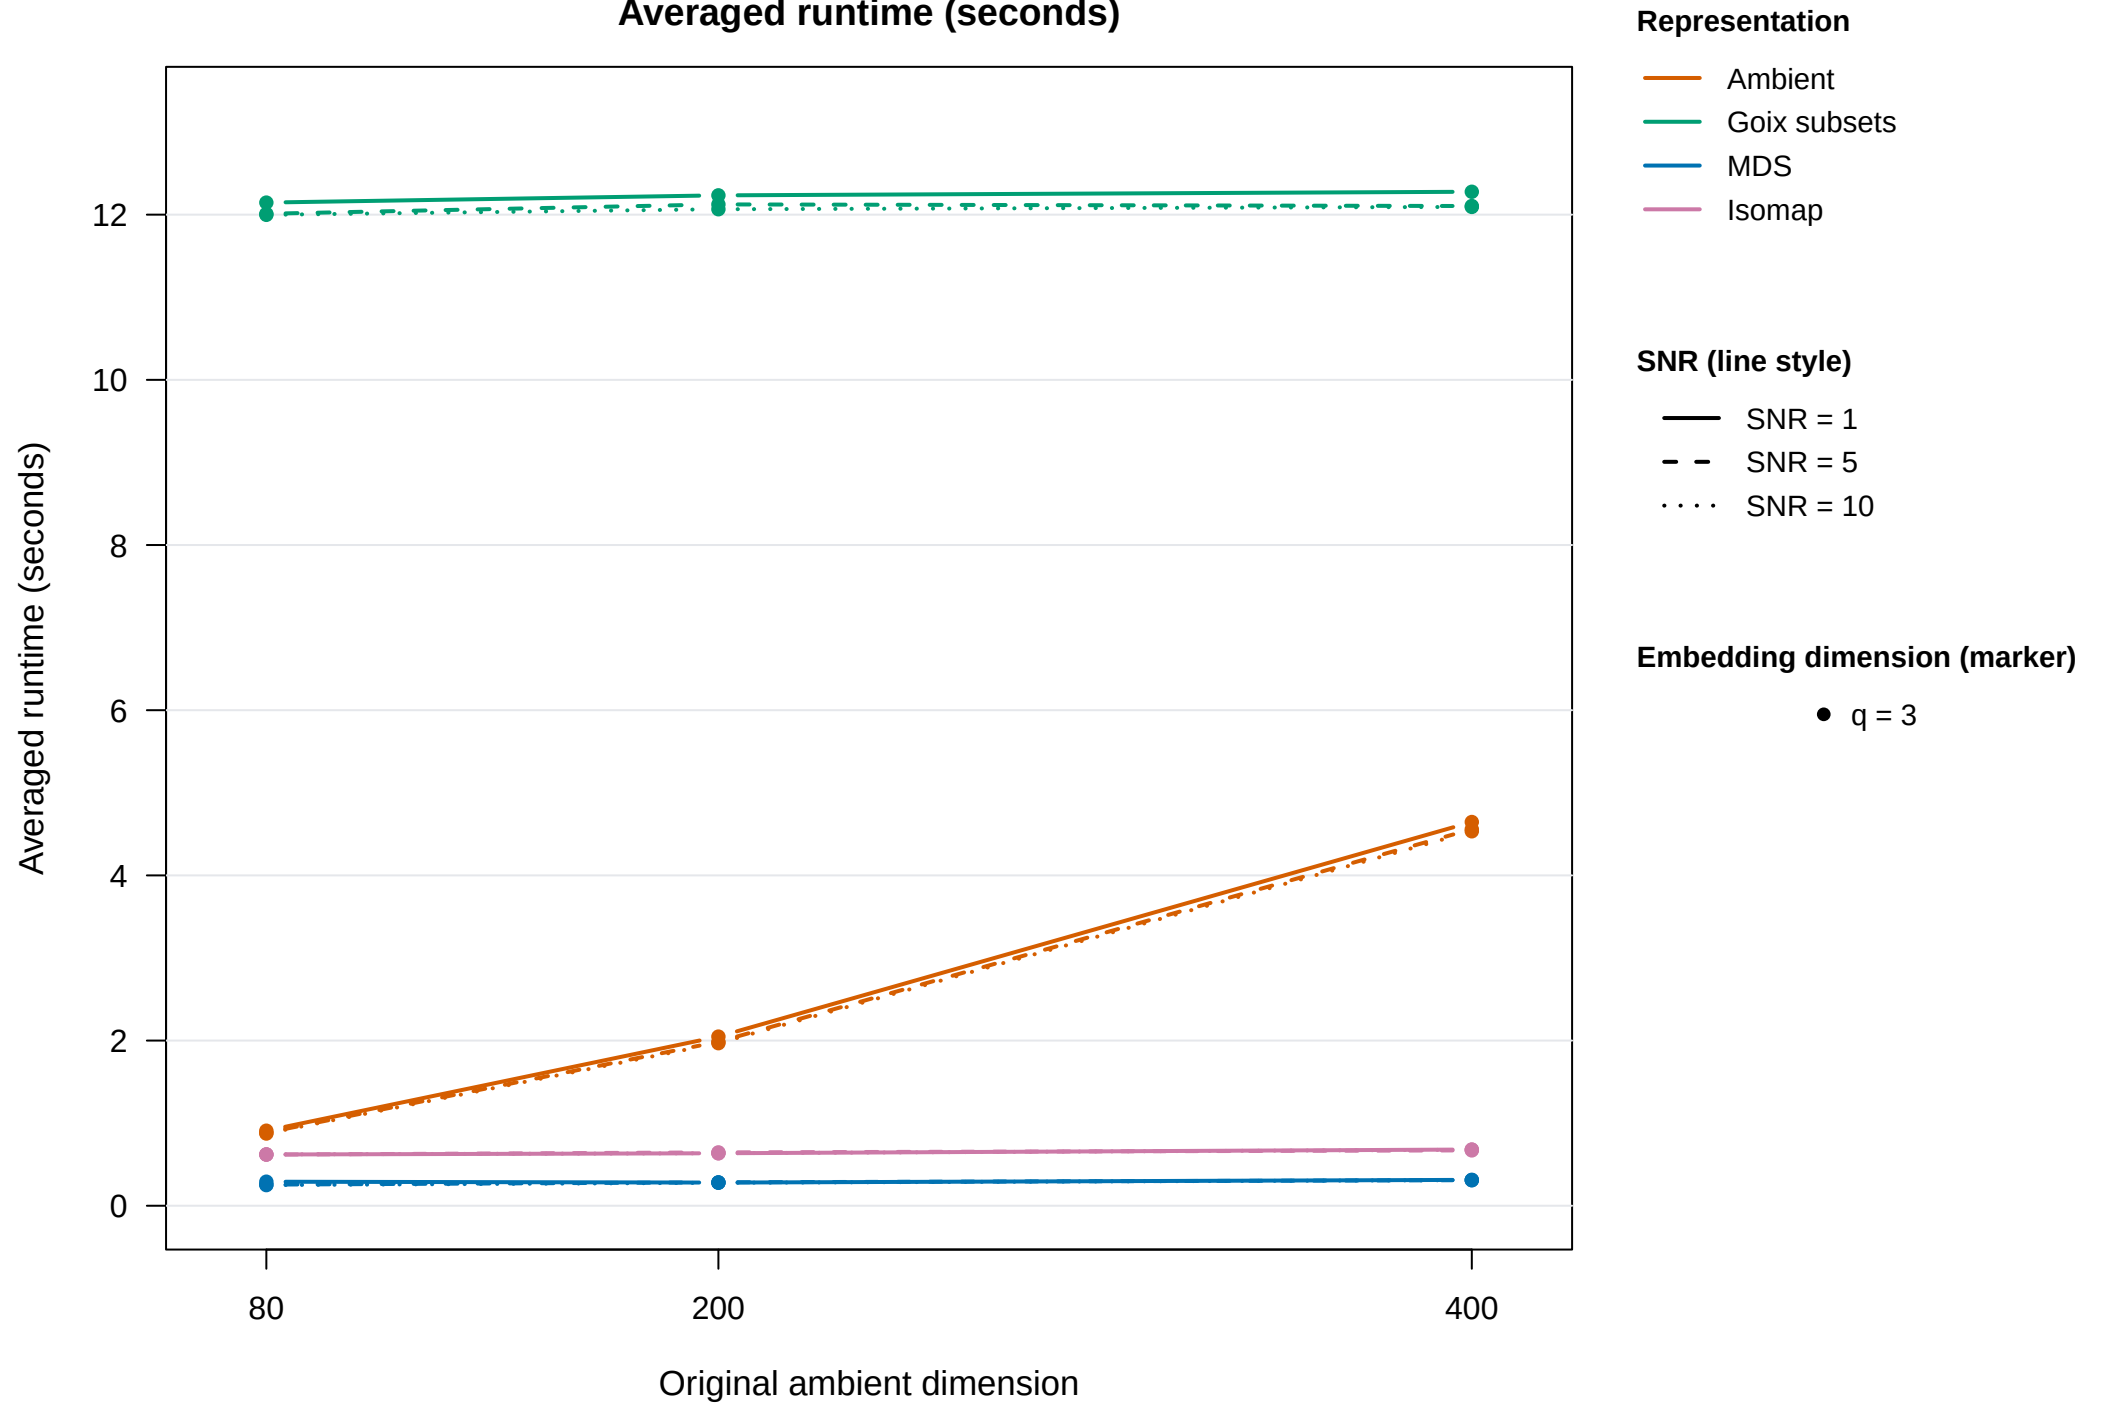

# Polynomial | intrinsic dimension = 3

## Averaged low occupancy

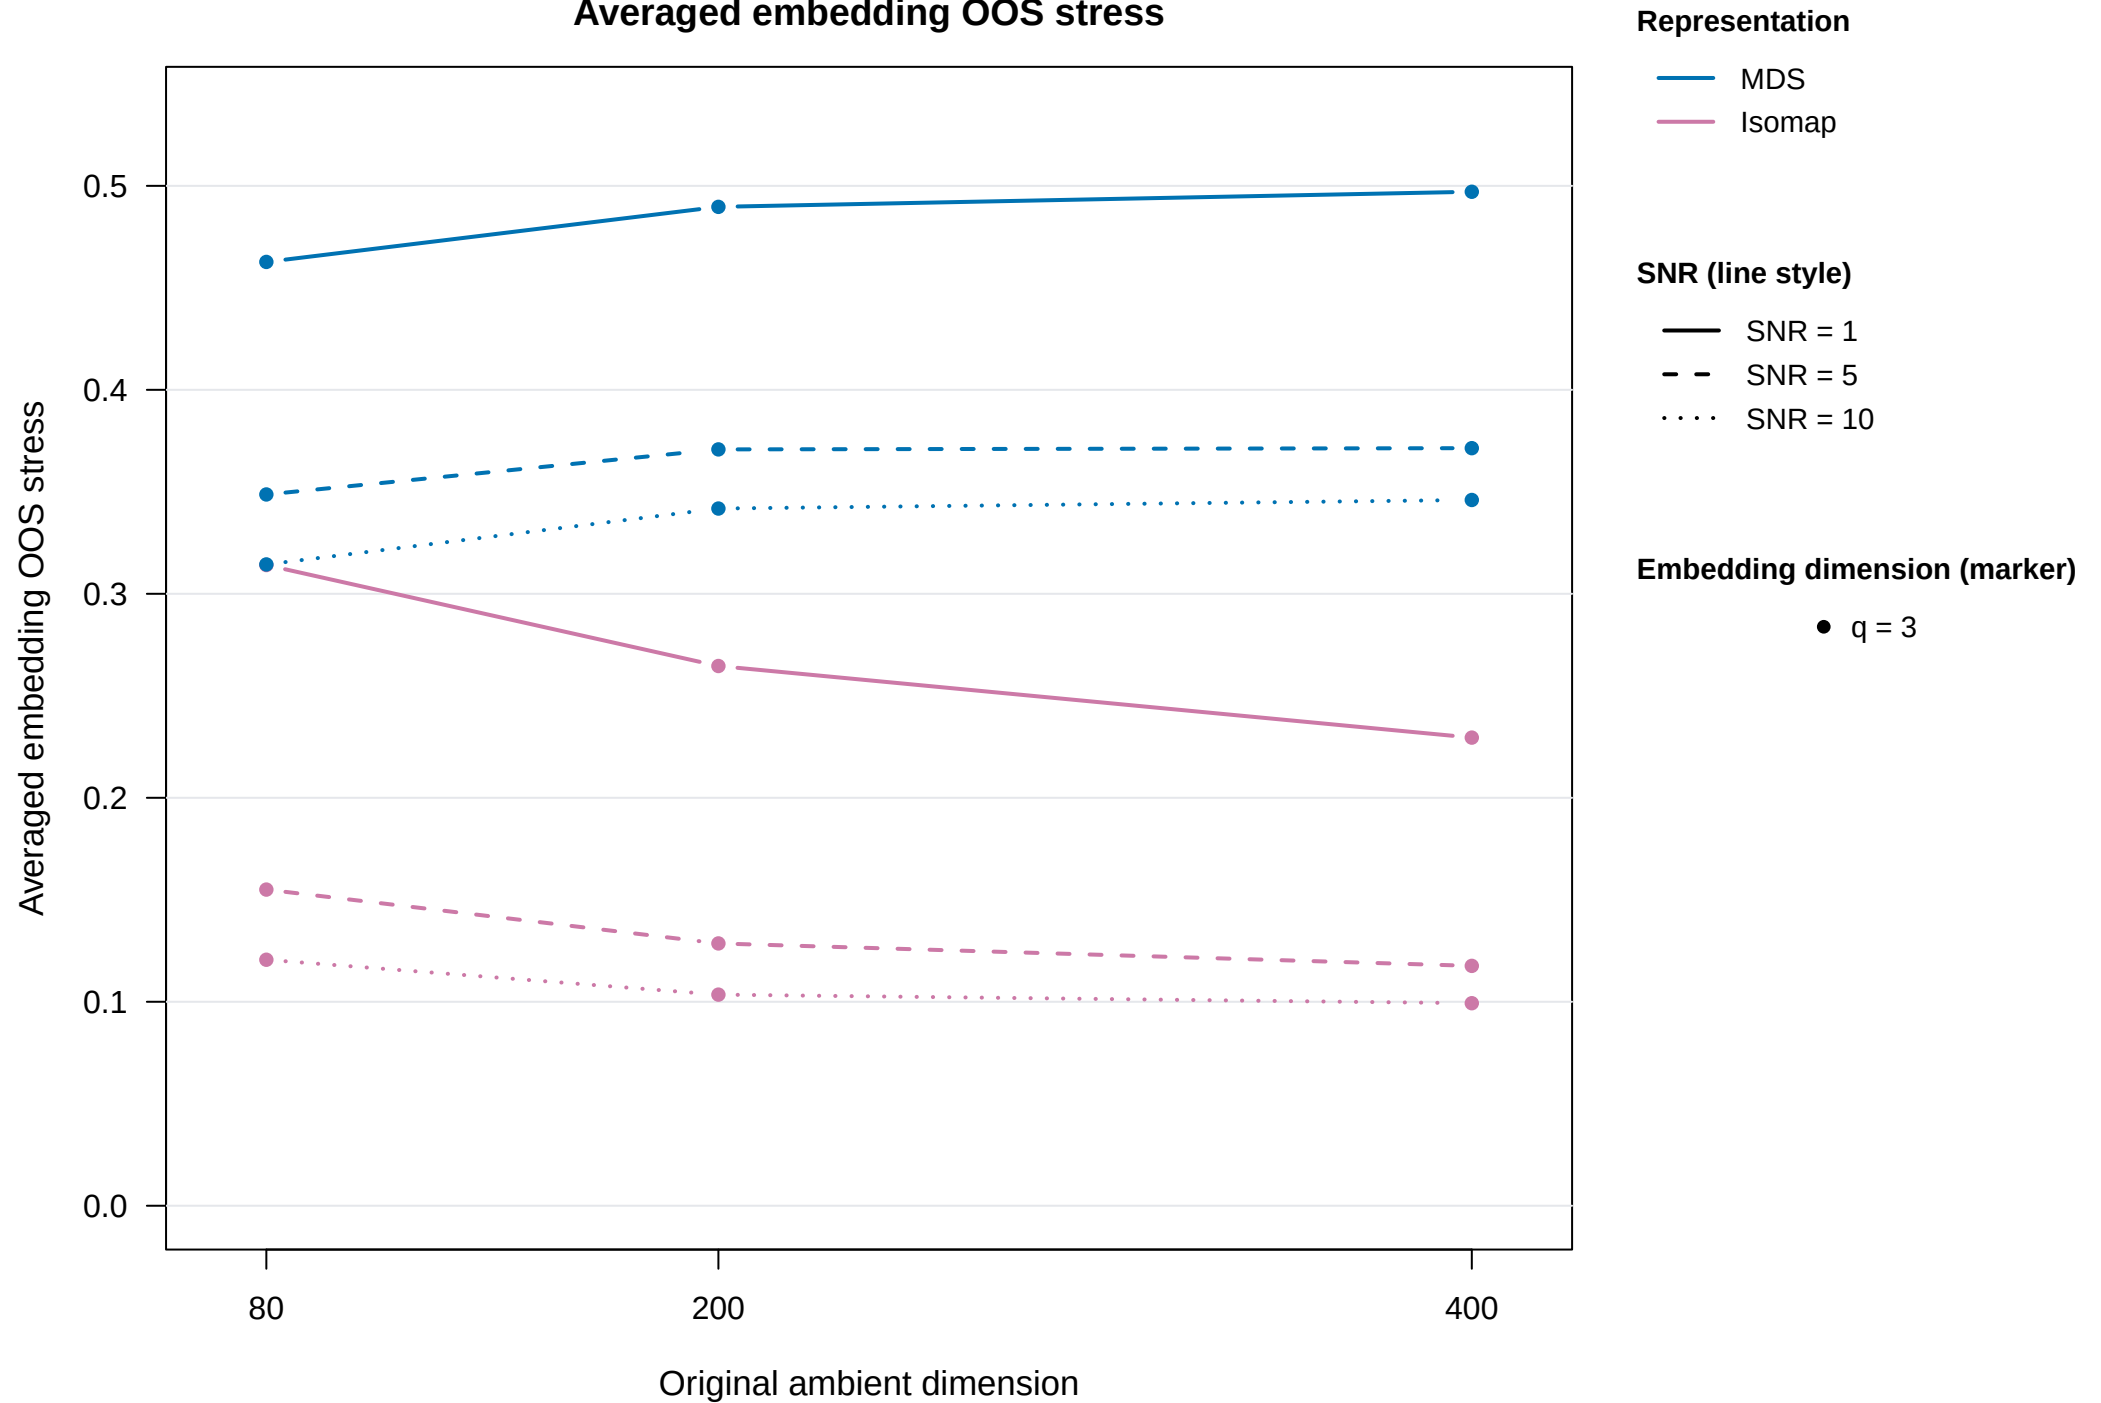

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

Polynomial | intrinsic dimension = 3  
Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

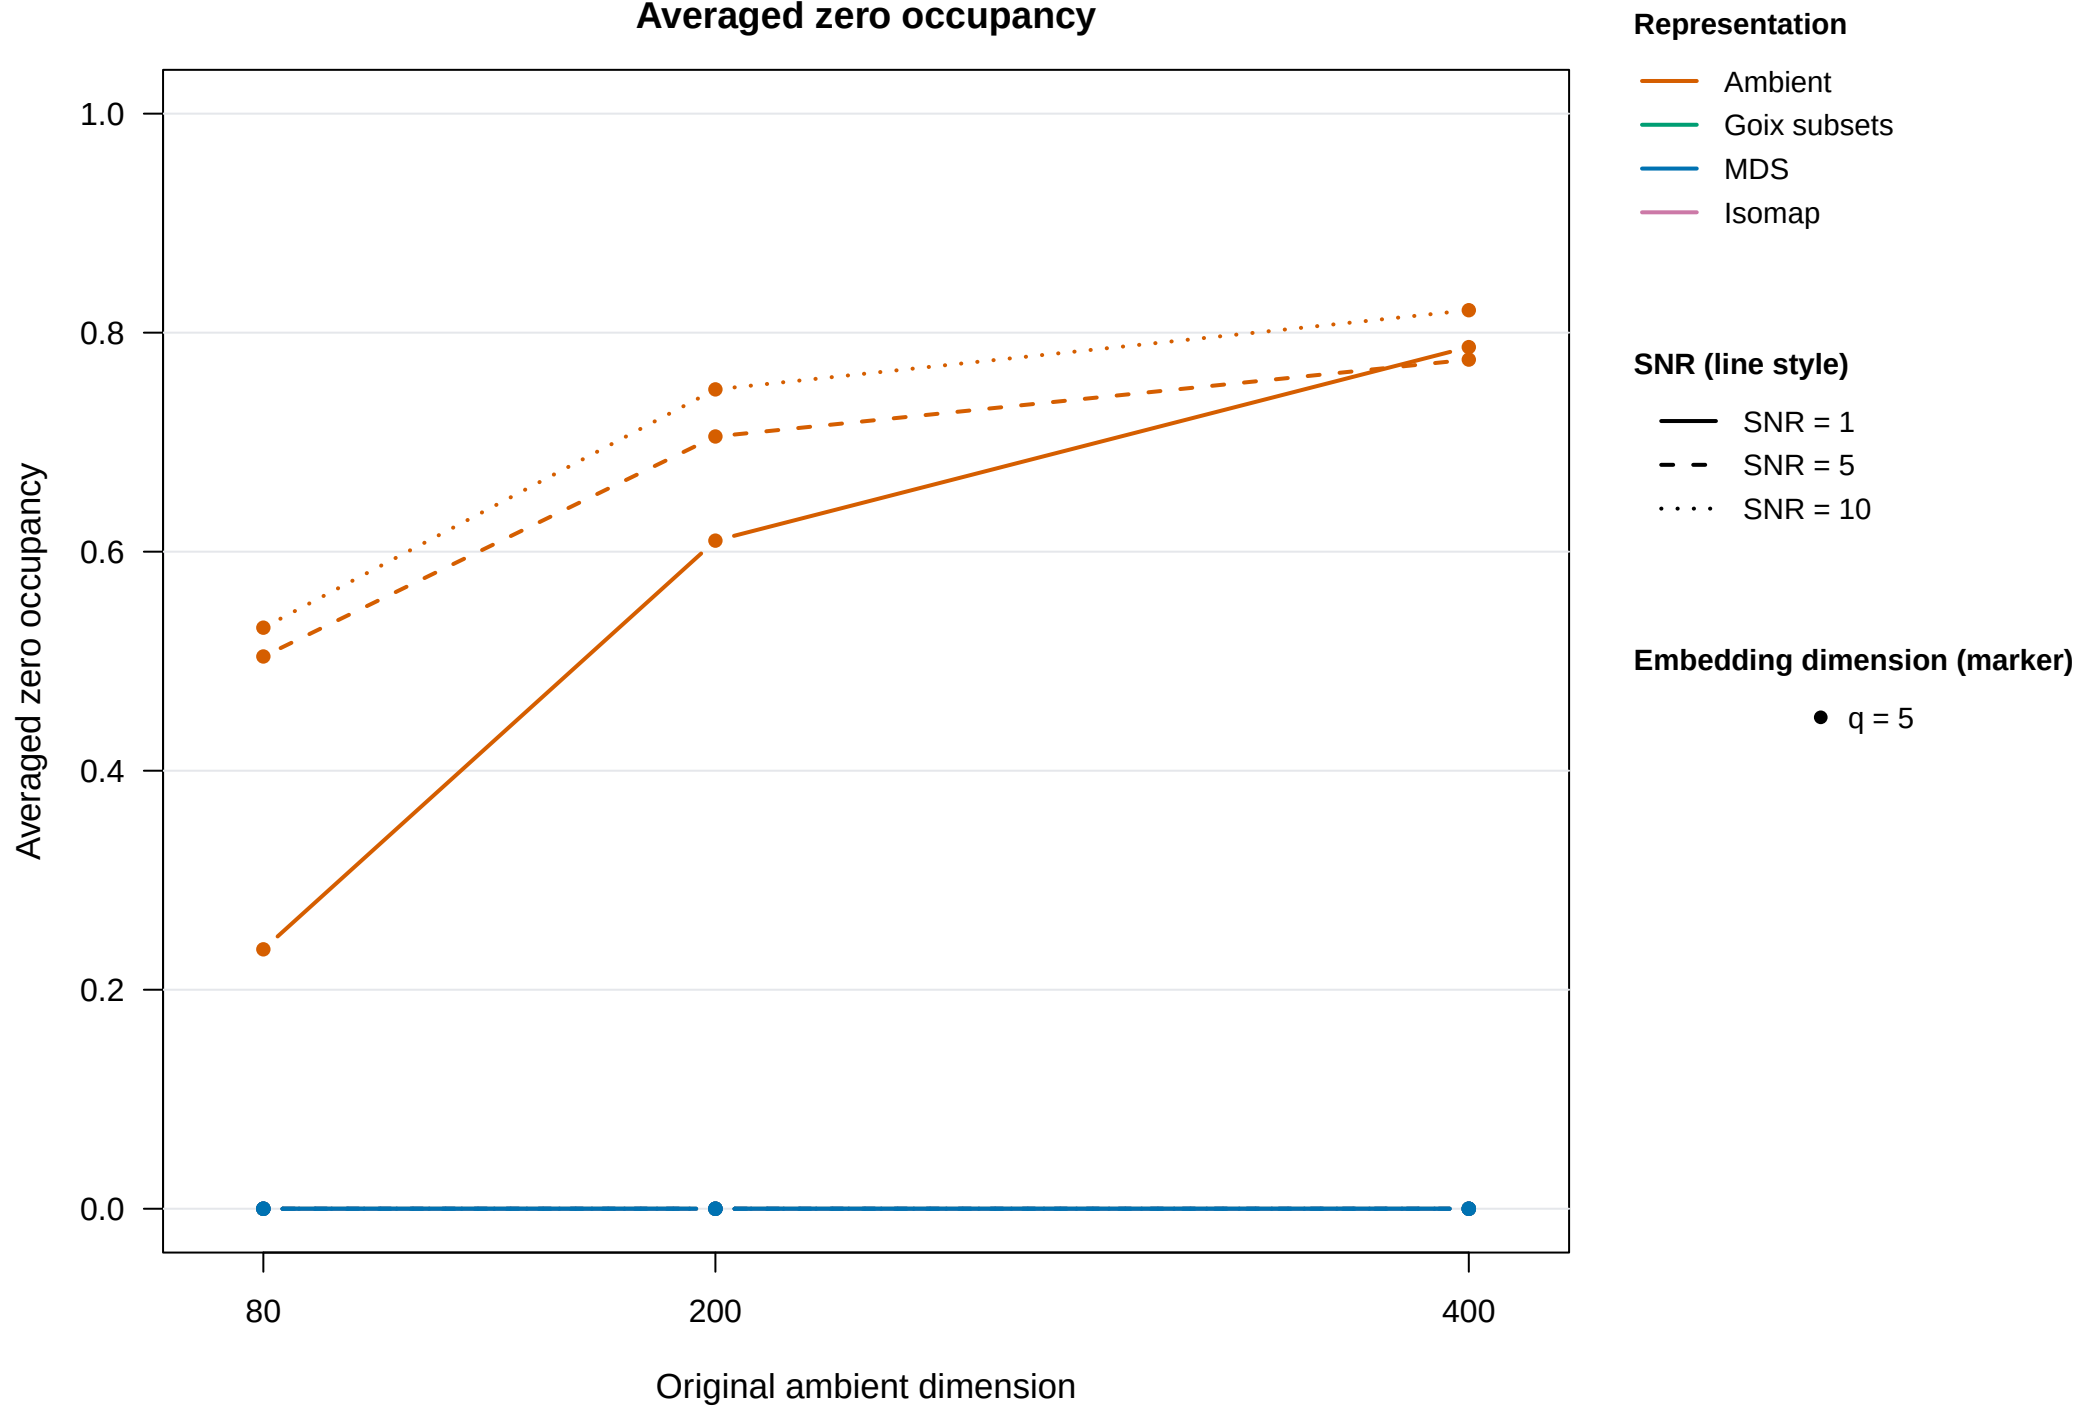

Polynomial | intrinsic dimension = 3  
Averaged embedding OOS stress

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Polynomial | intrinsic dimension = 5

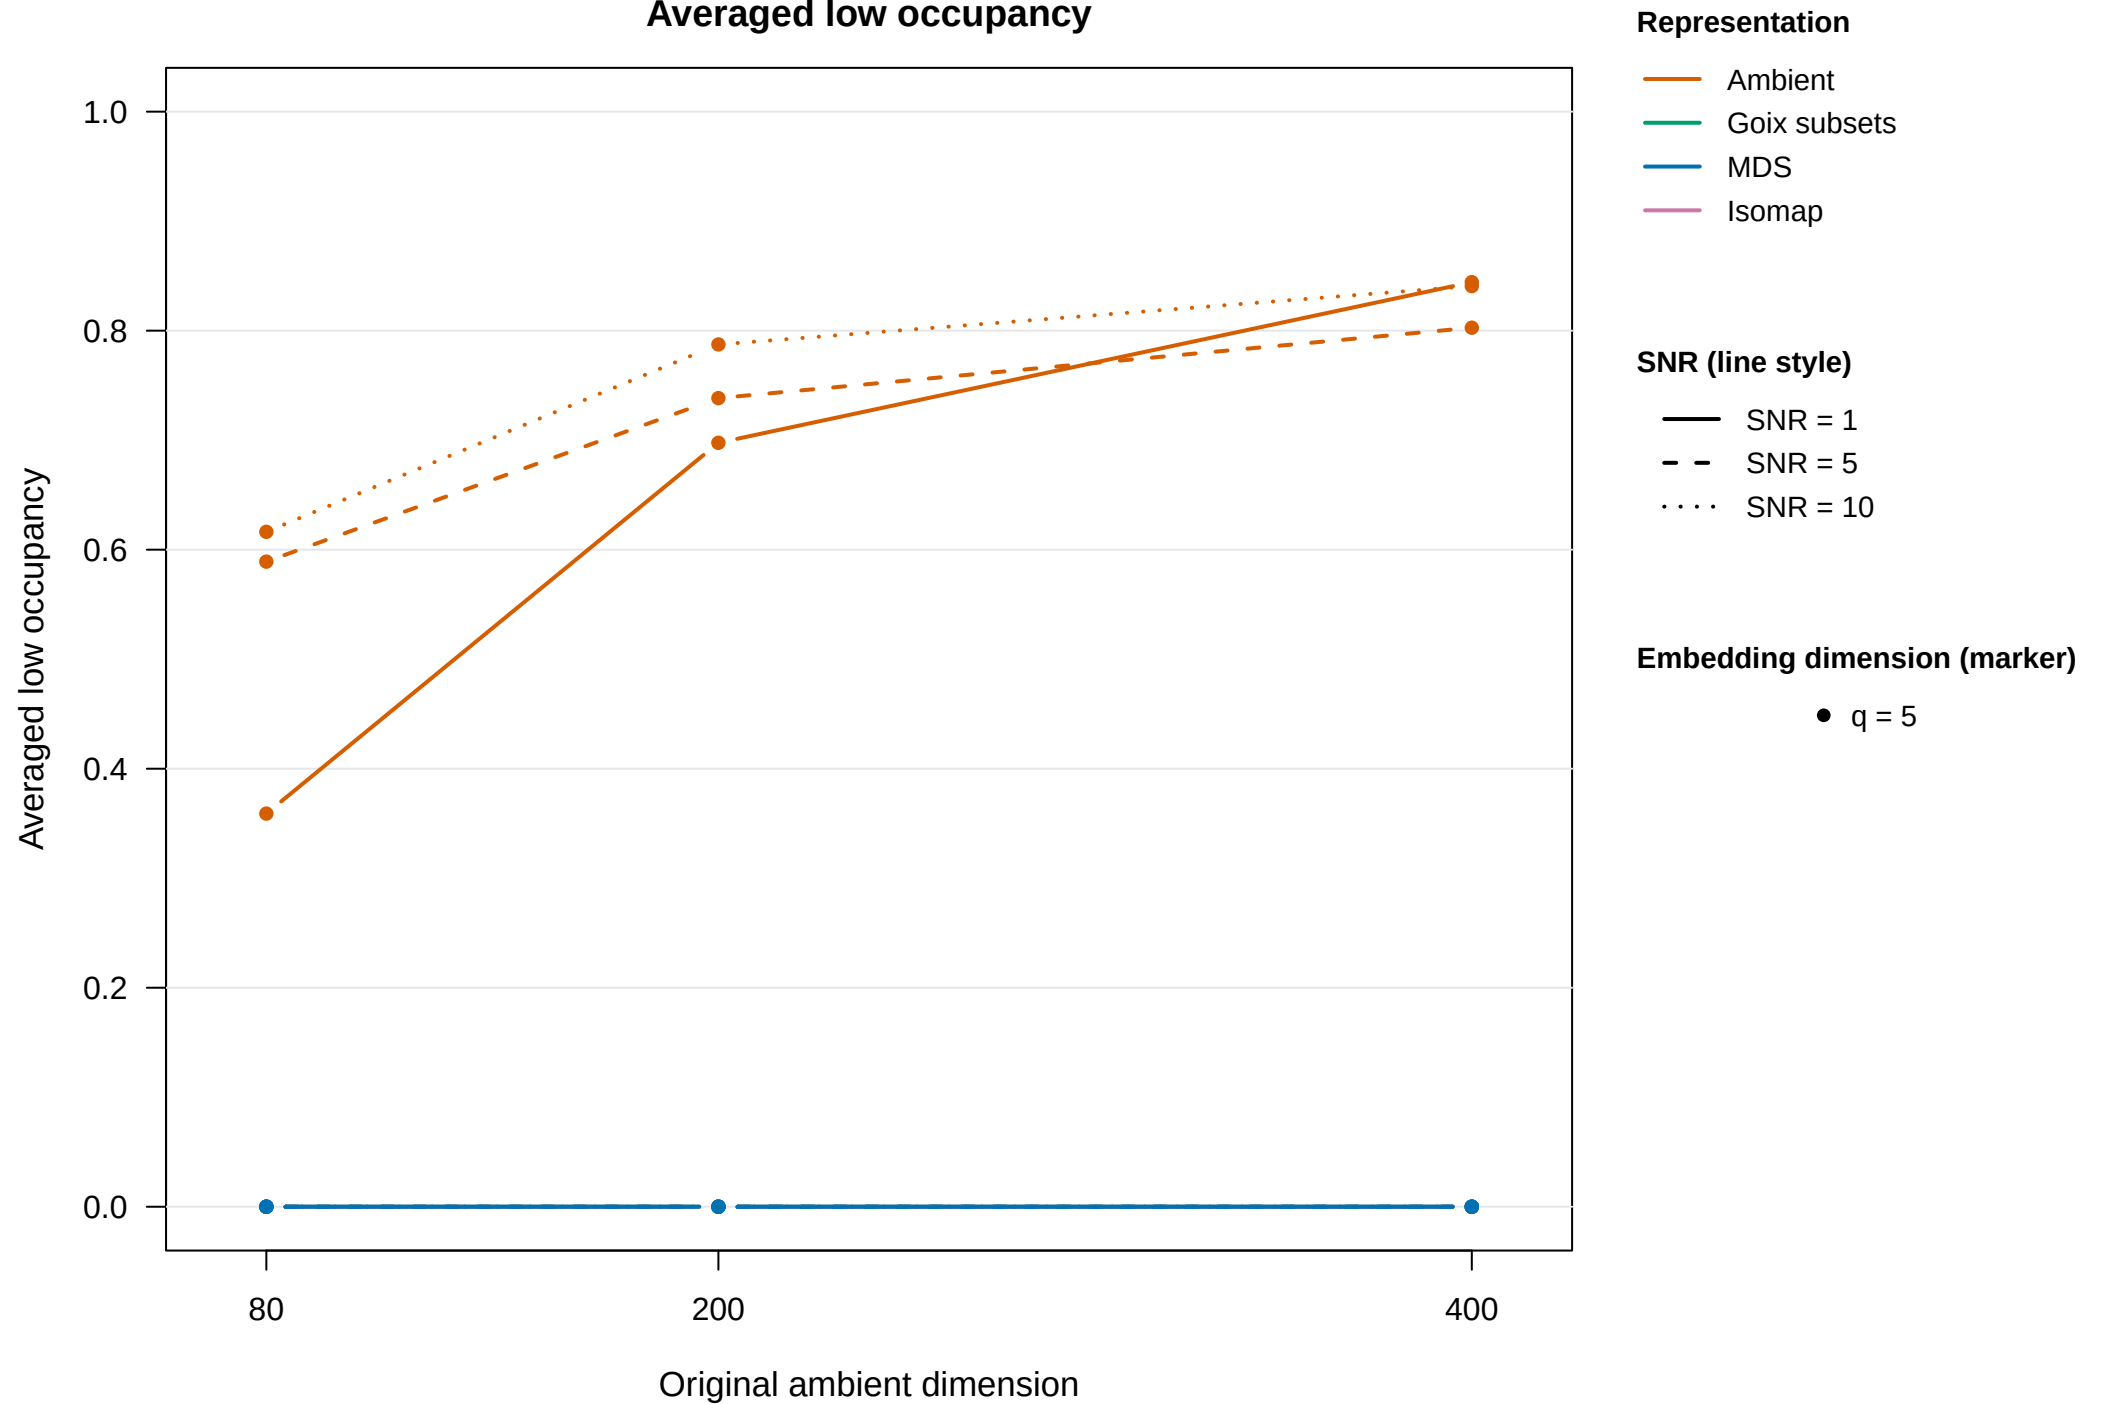

## Averaged zero occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

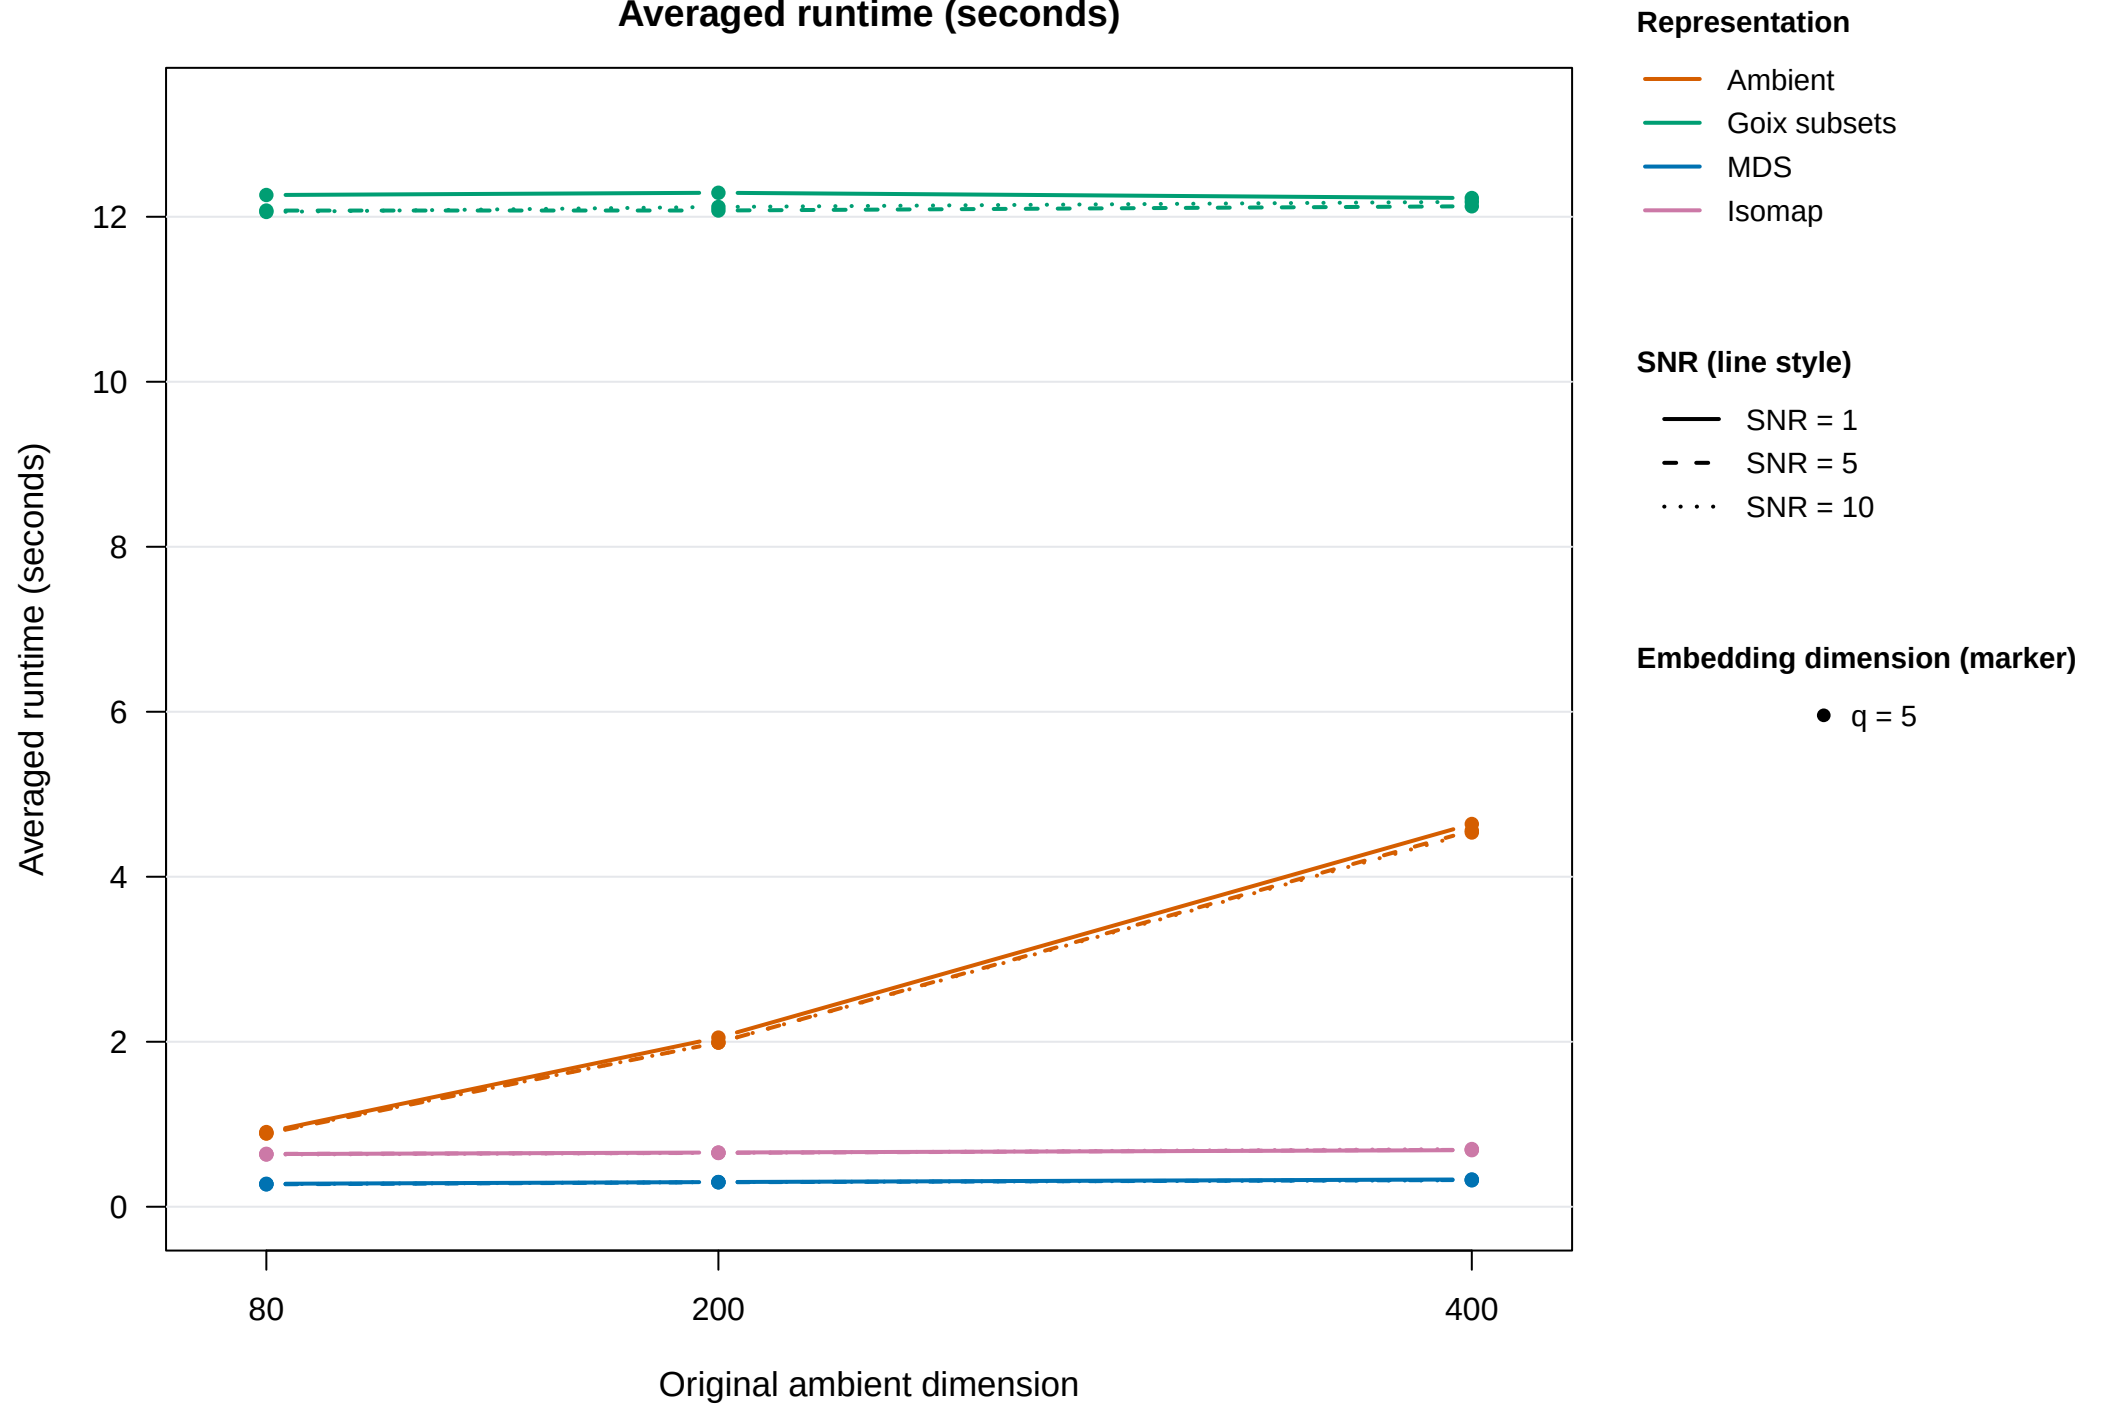

# Polynomial | intrinsic dimension = 5

## Averaged low occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

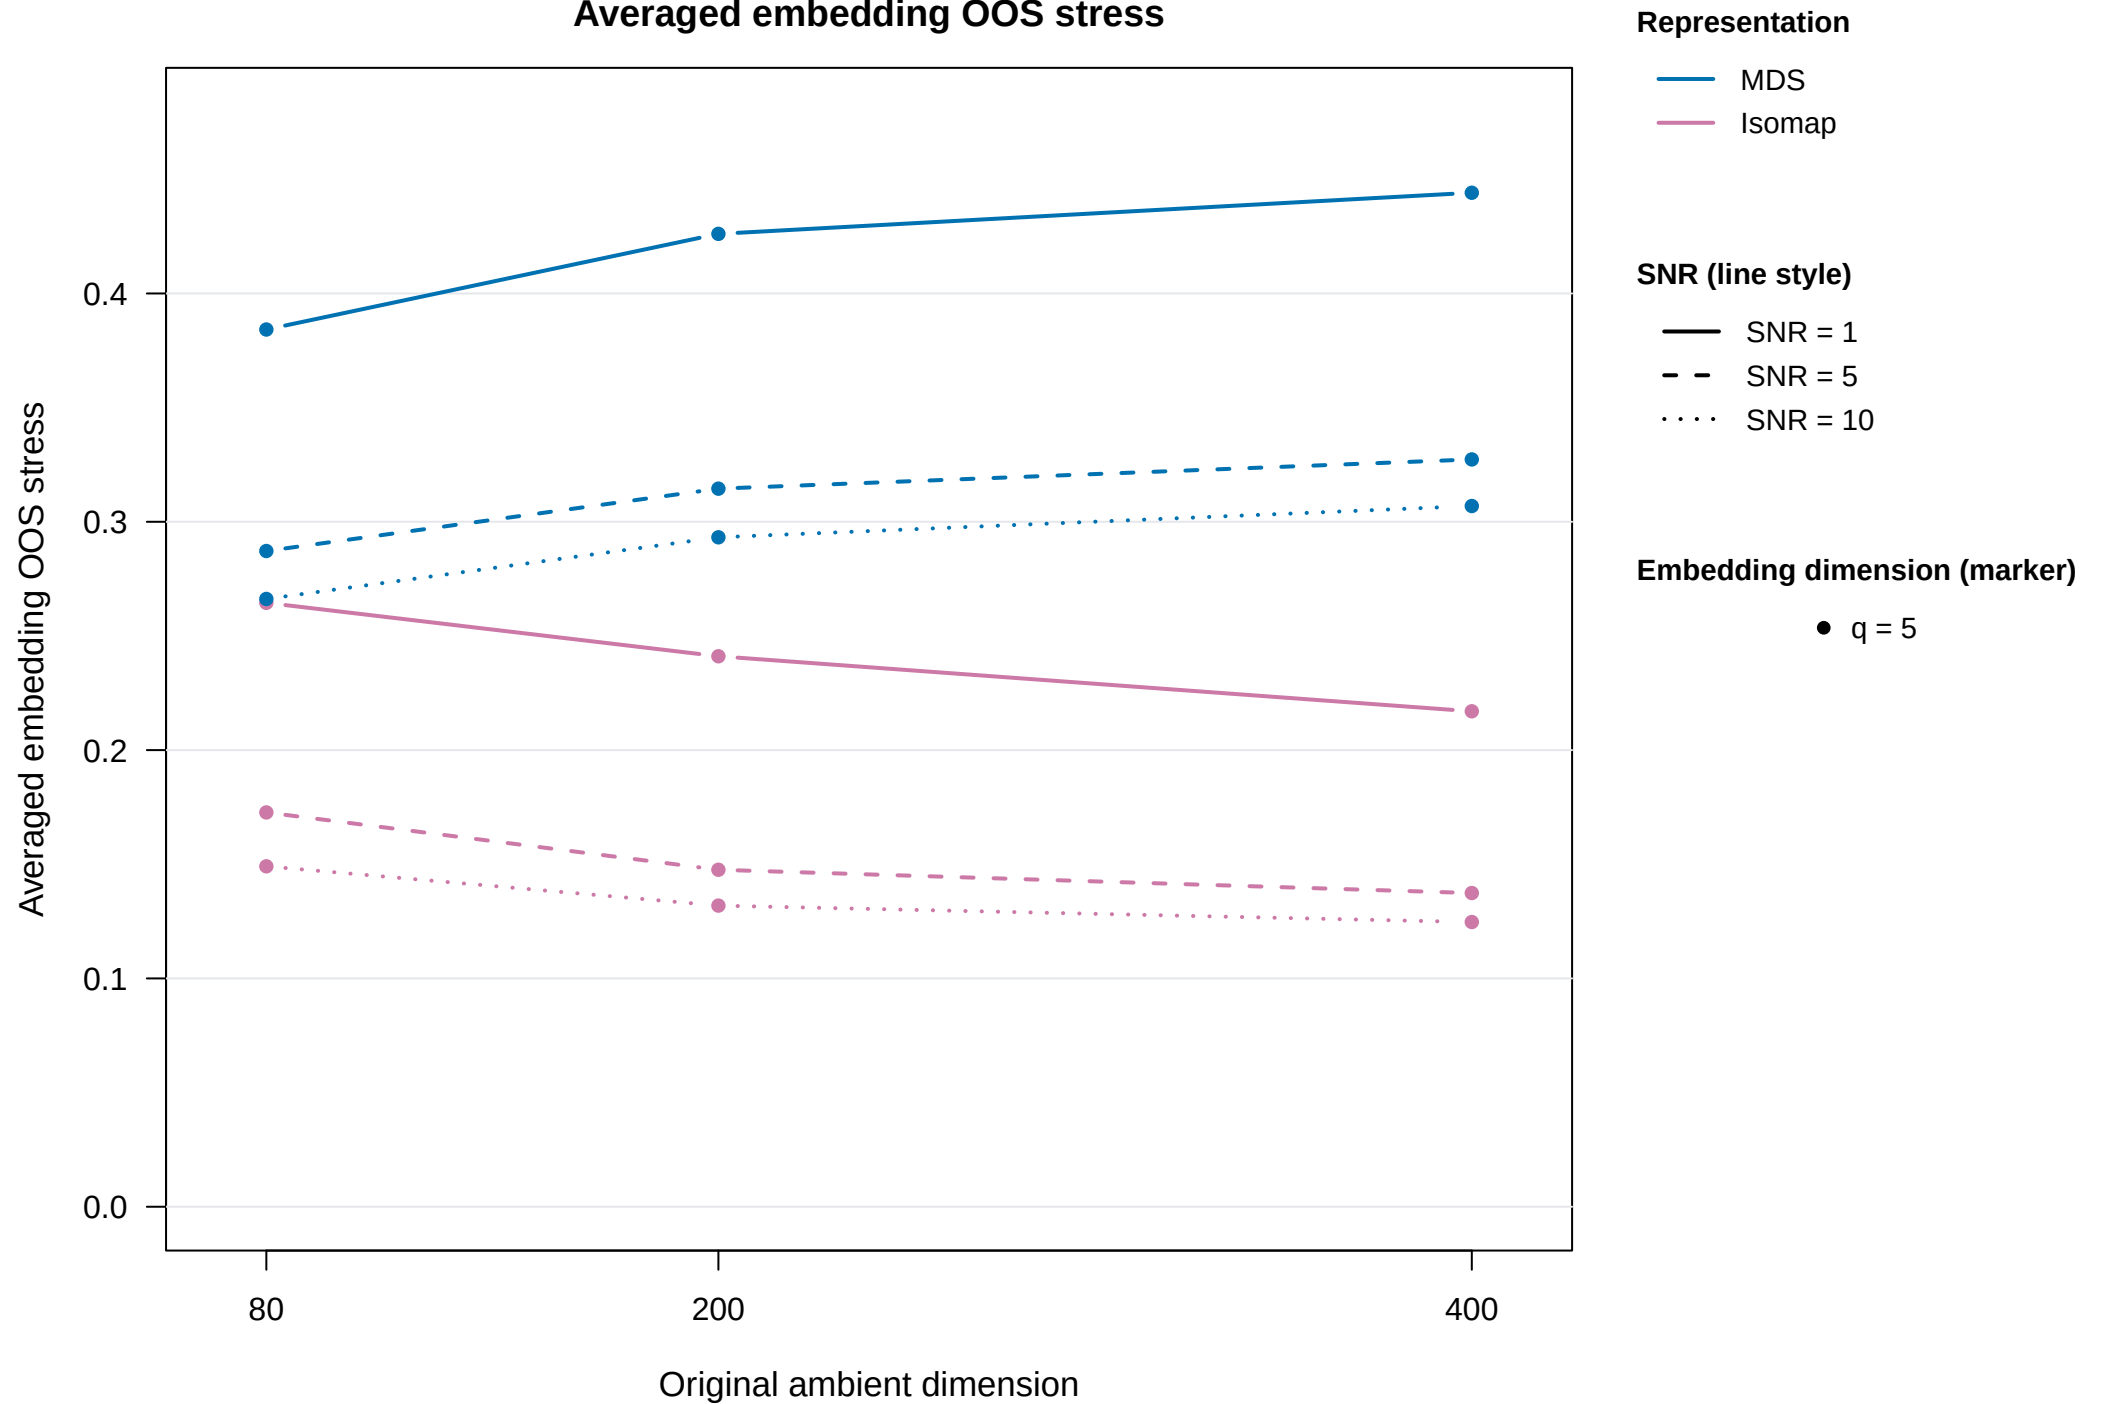

Polynomial | intrinsic dimension = 5  
Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

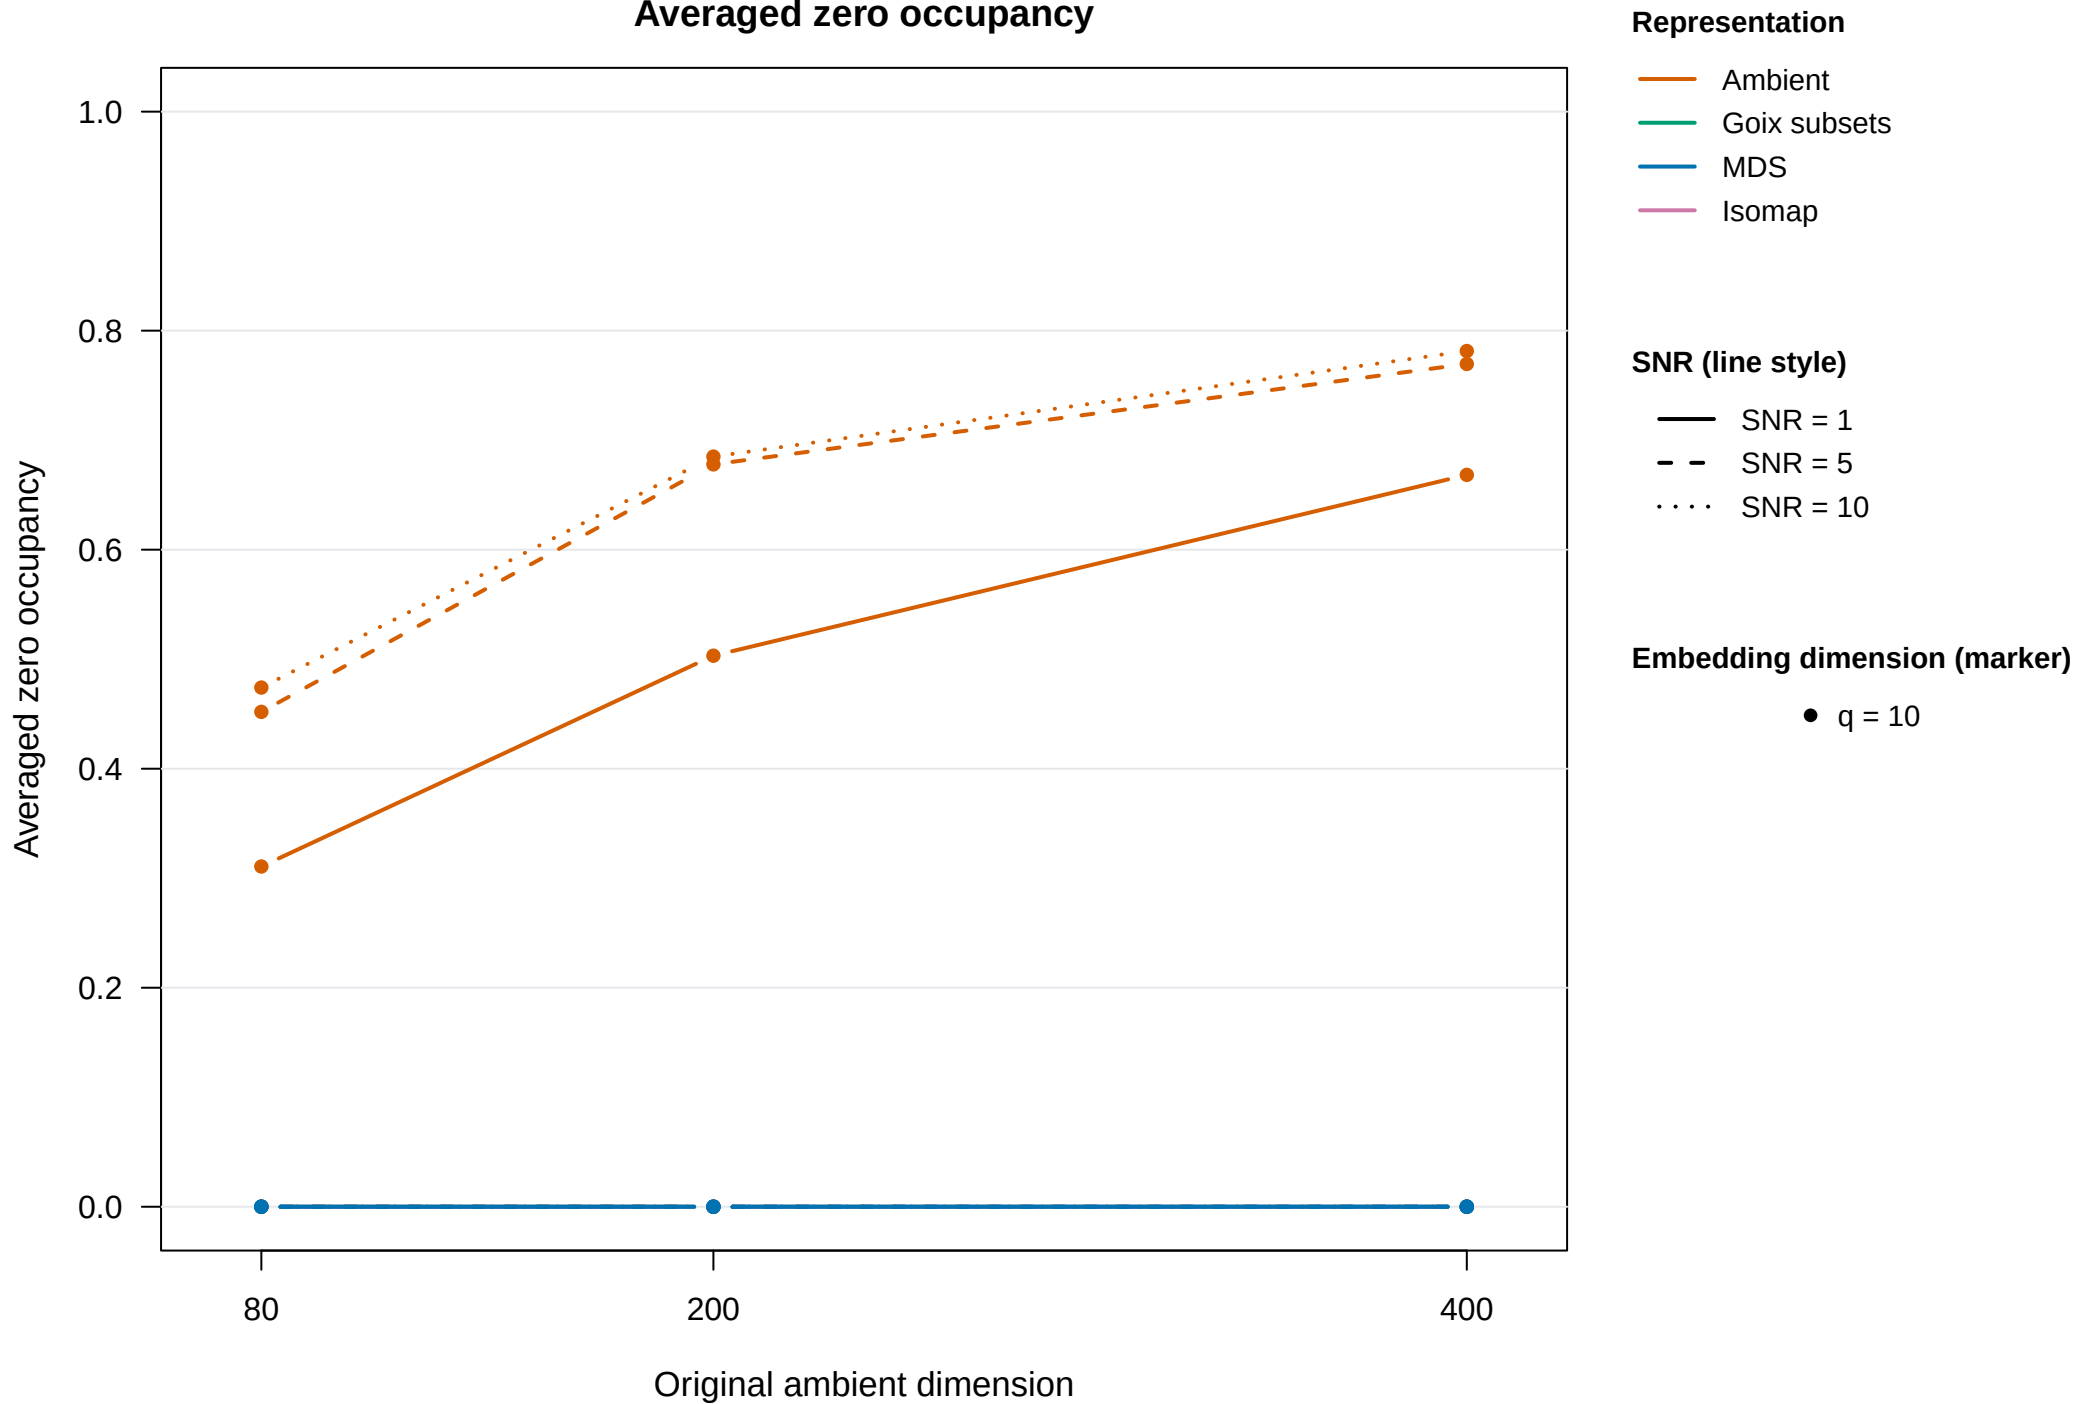

# Polynomial | intrinsic dimension = 5

## Averaged embedding OOS stress

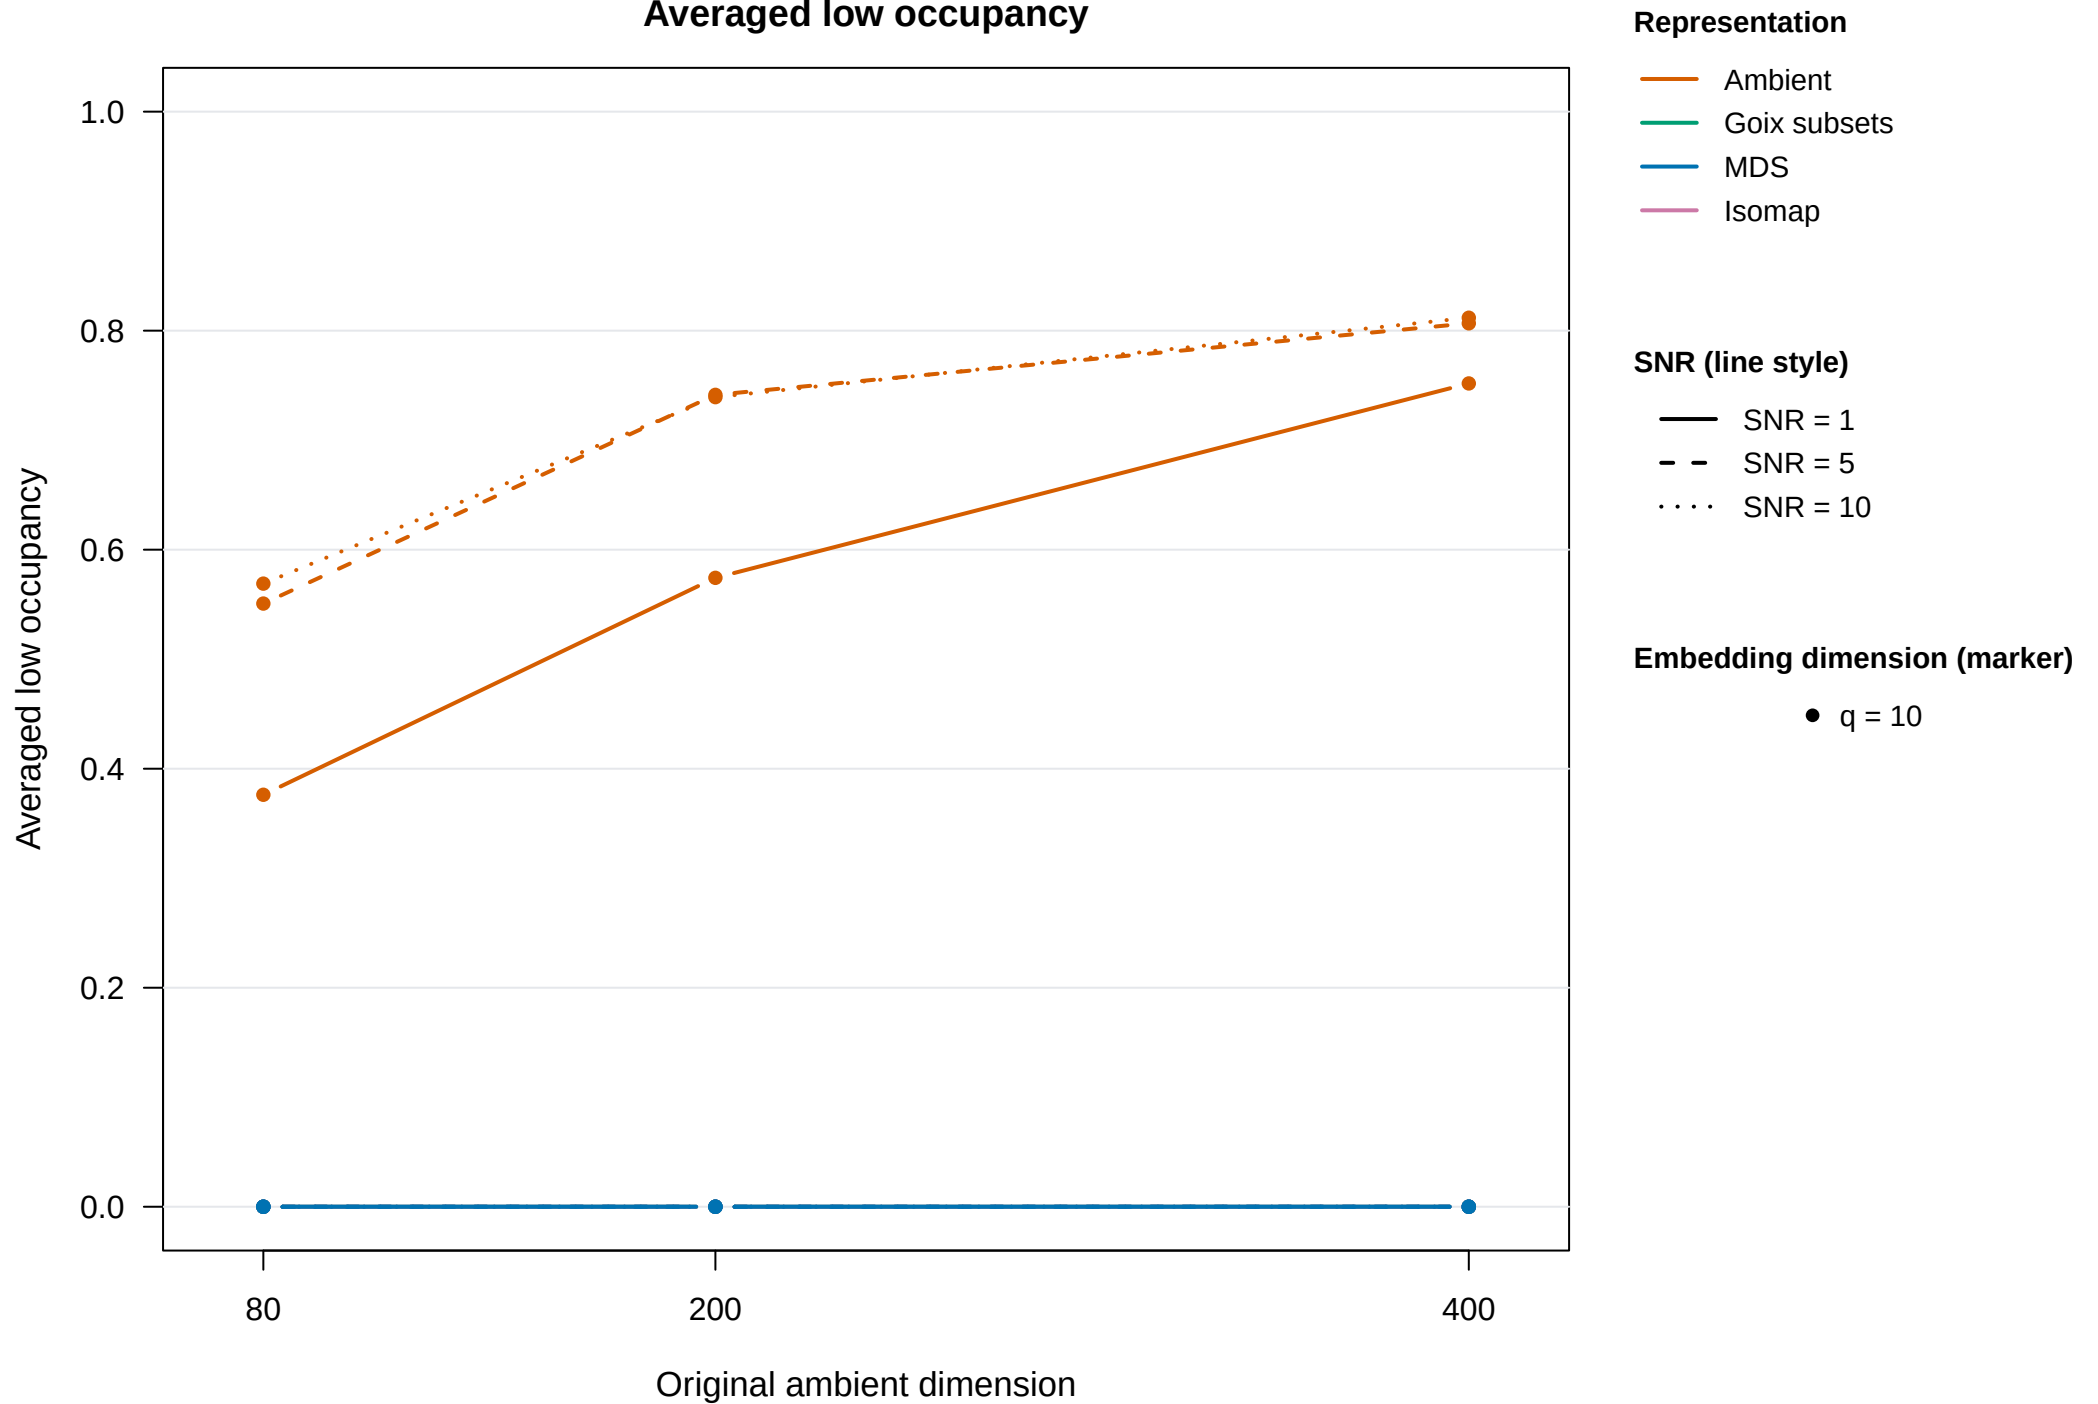

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

Polynomial | intrinsic dimension = 10  
Averaged zero occupancy

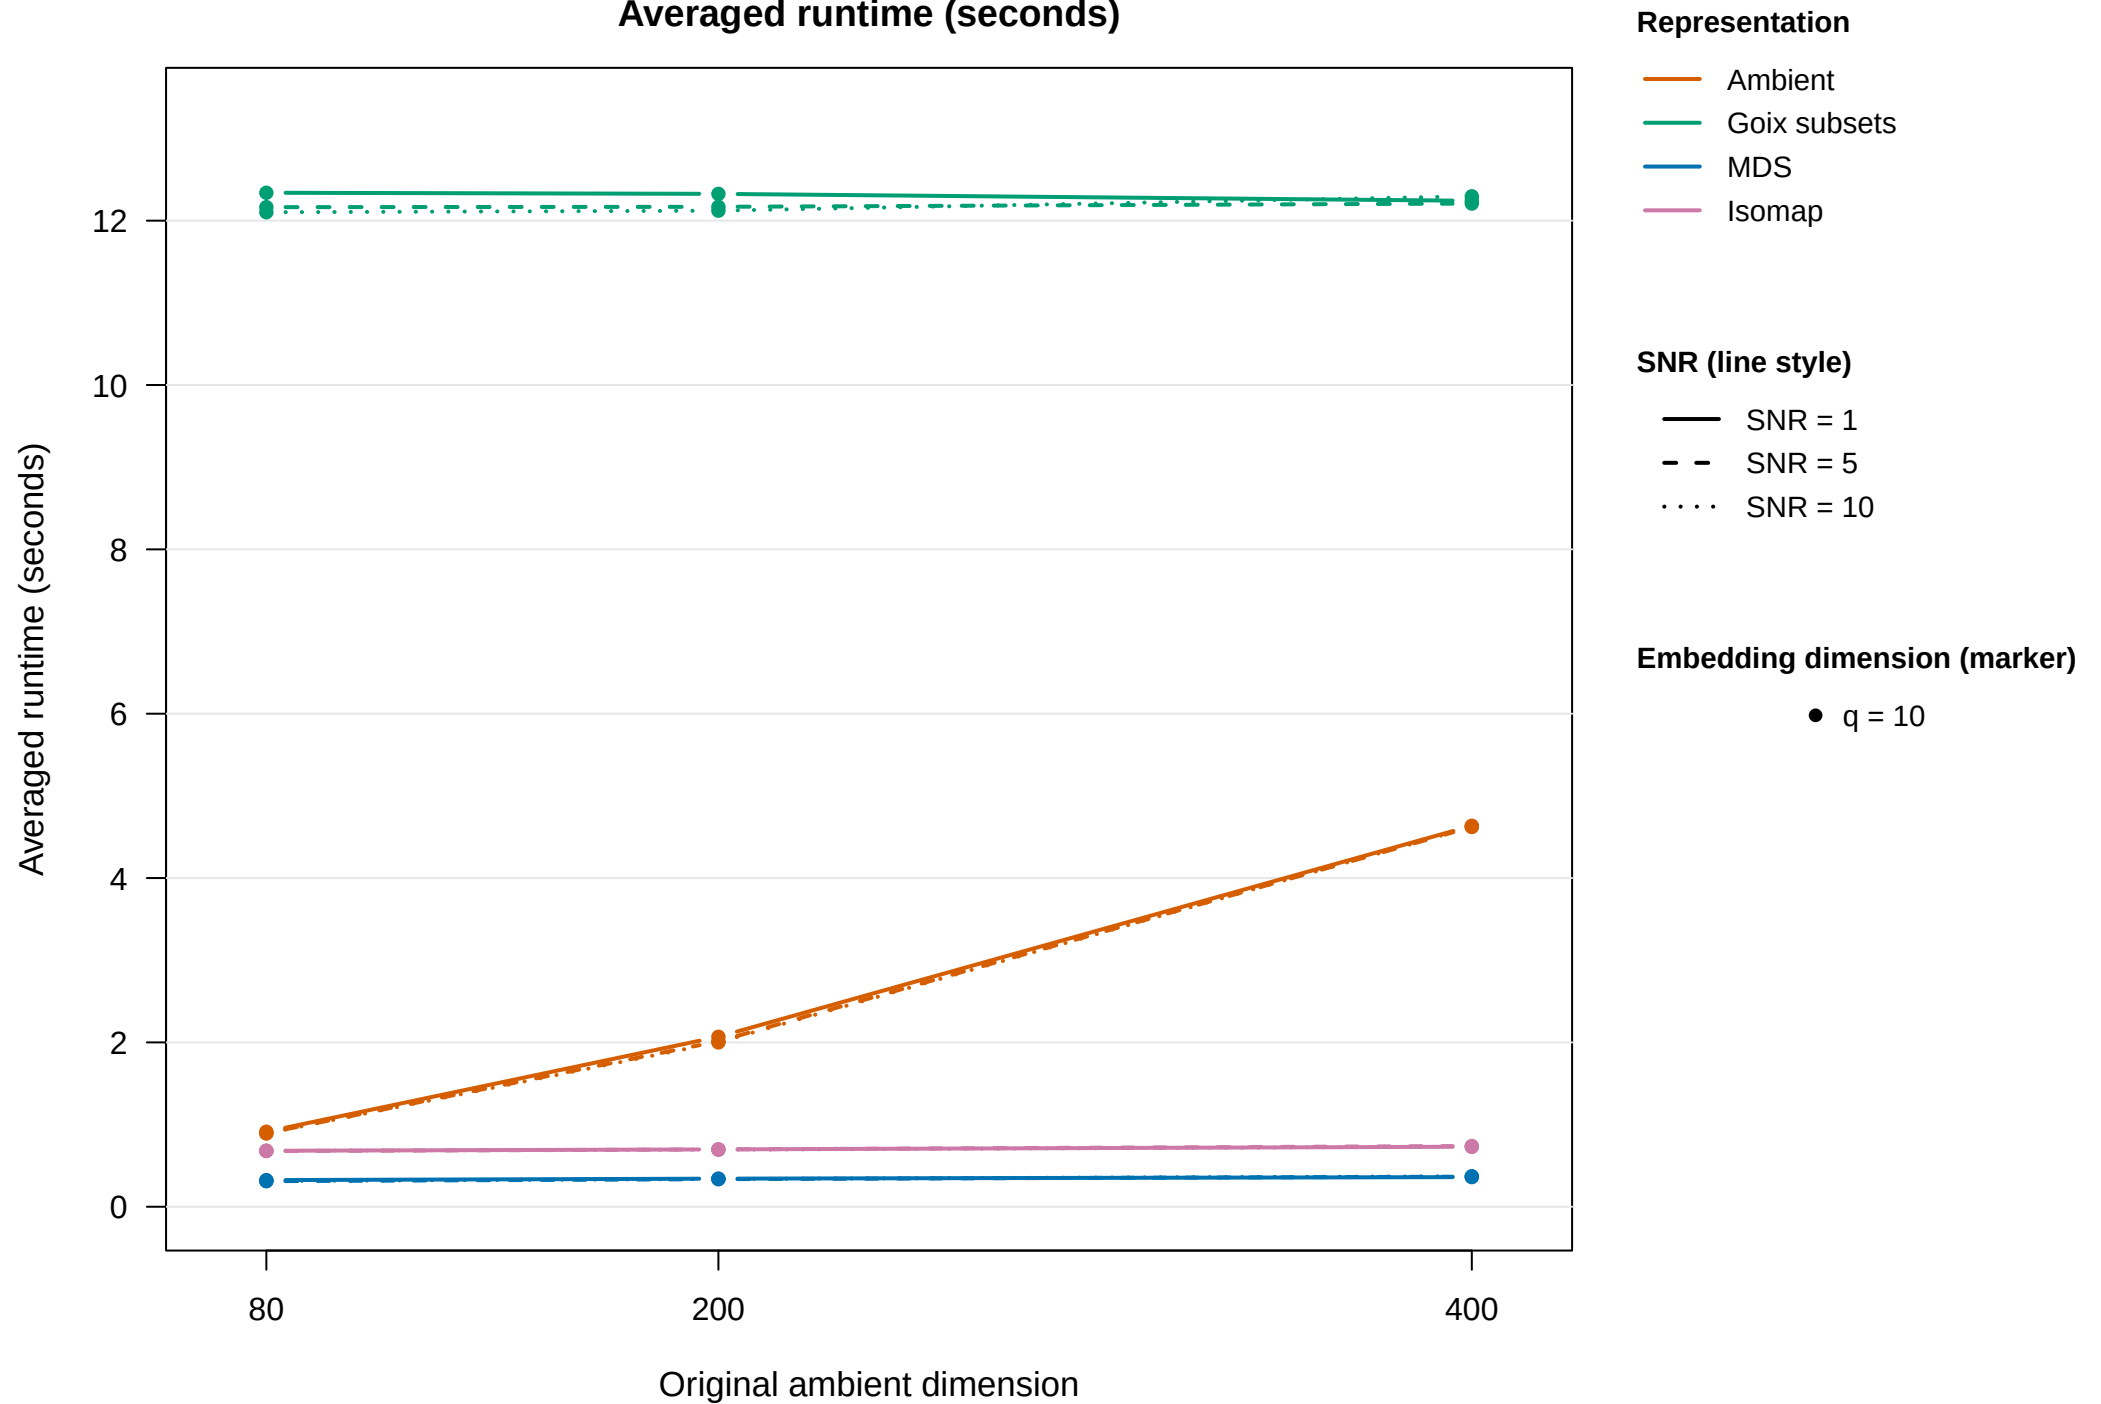

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

Polynomial | intrinsic dimension = 10  
Averaged low occupancy

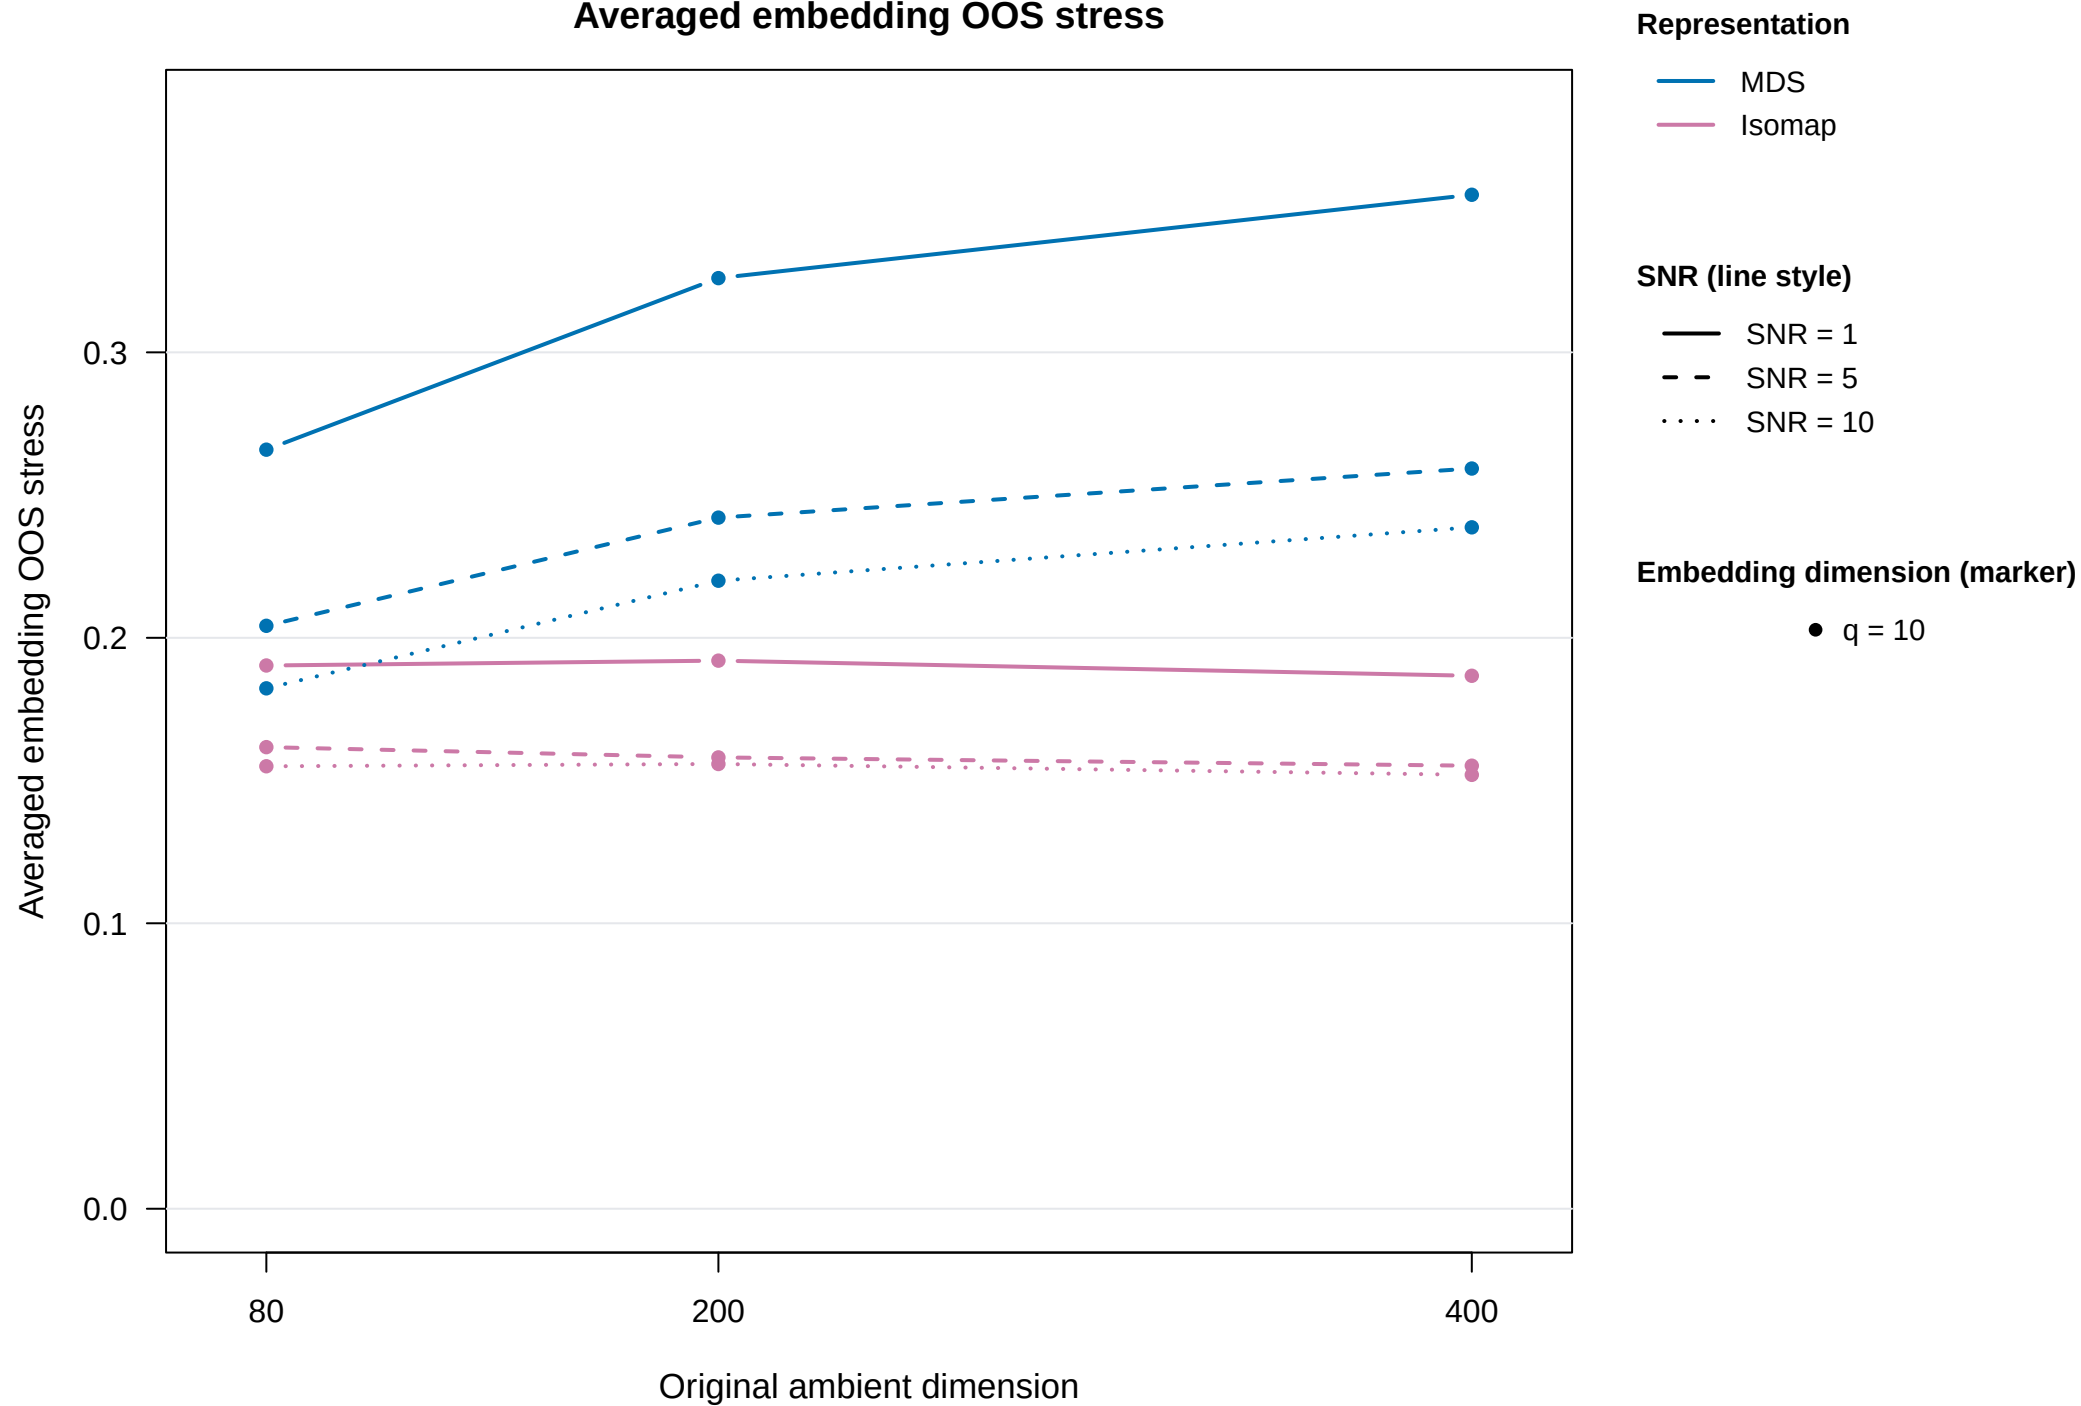

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

Polynomial | intrinsic dimension = 10  
Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

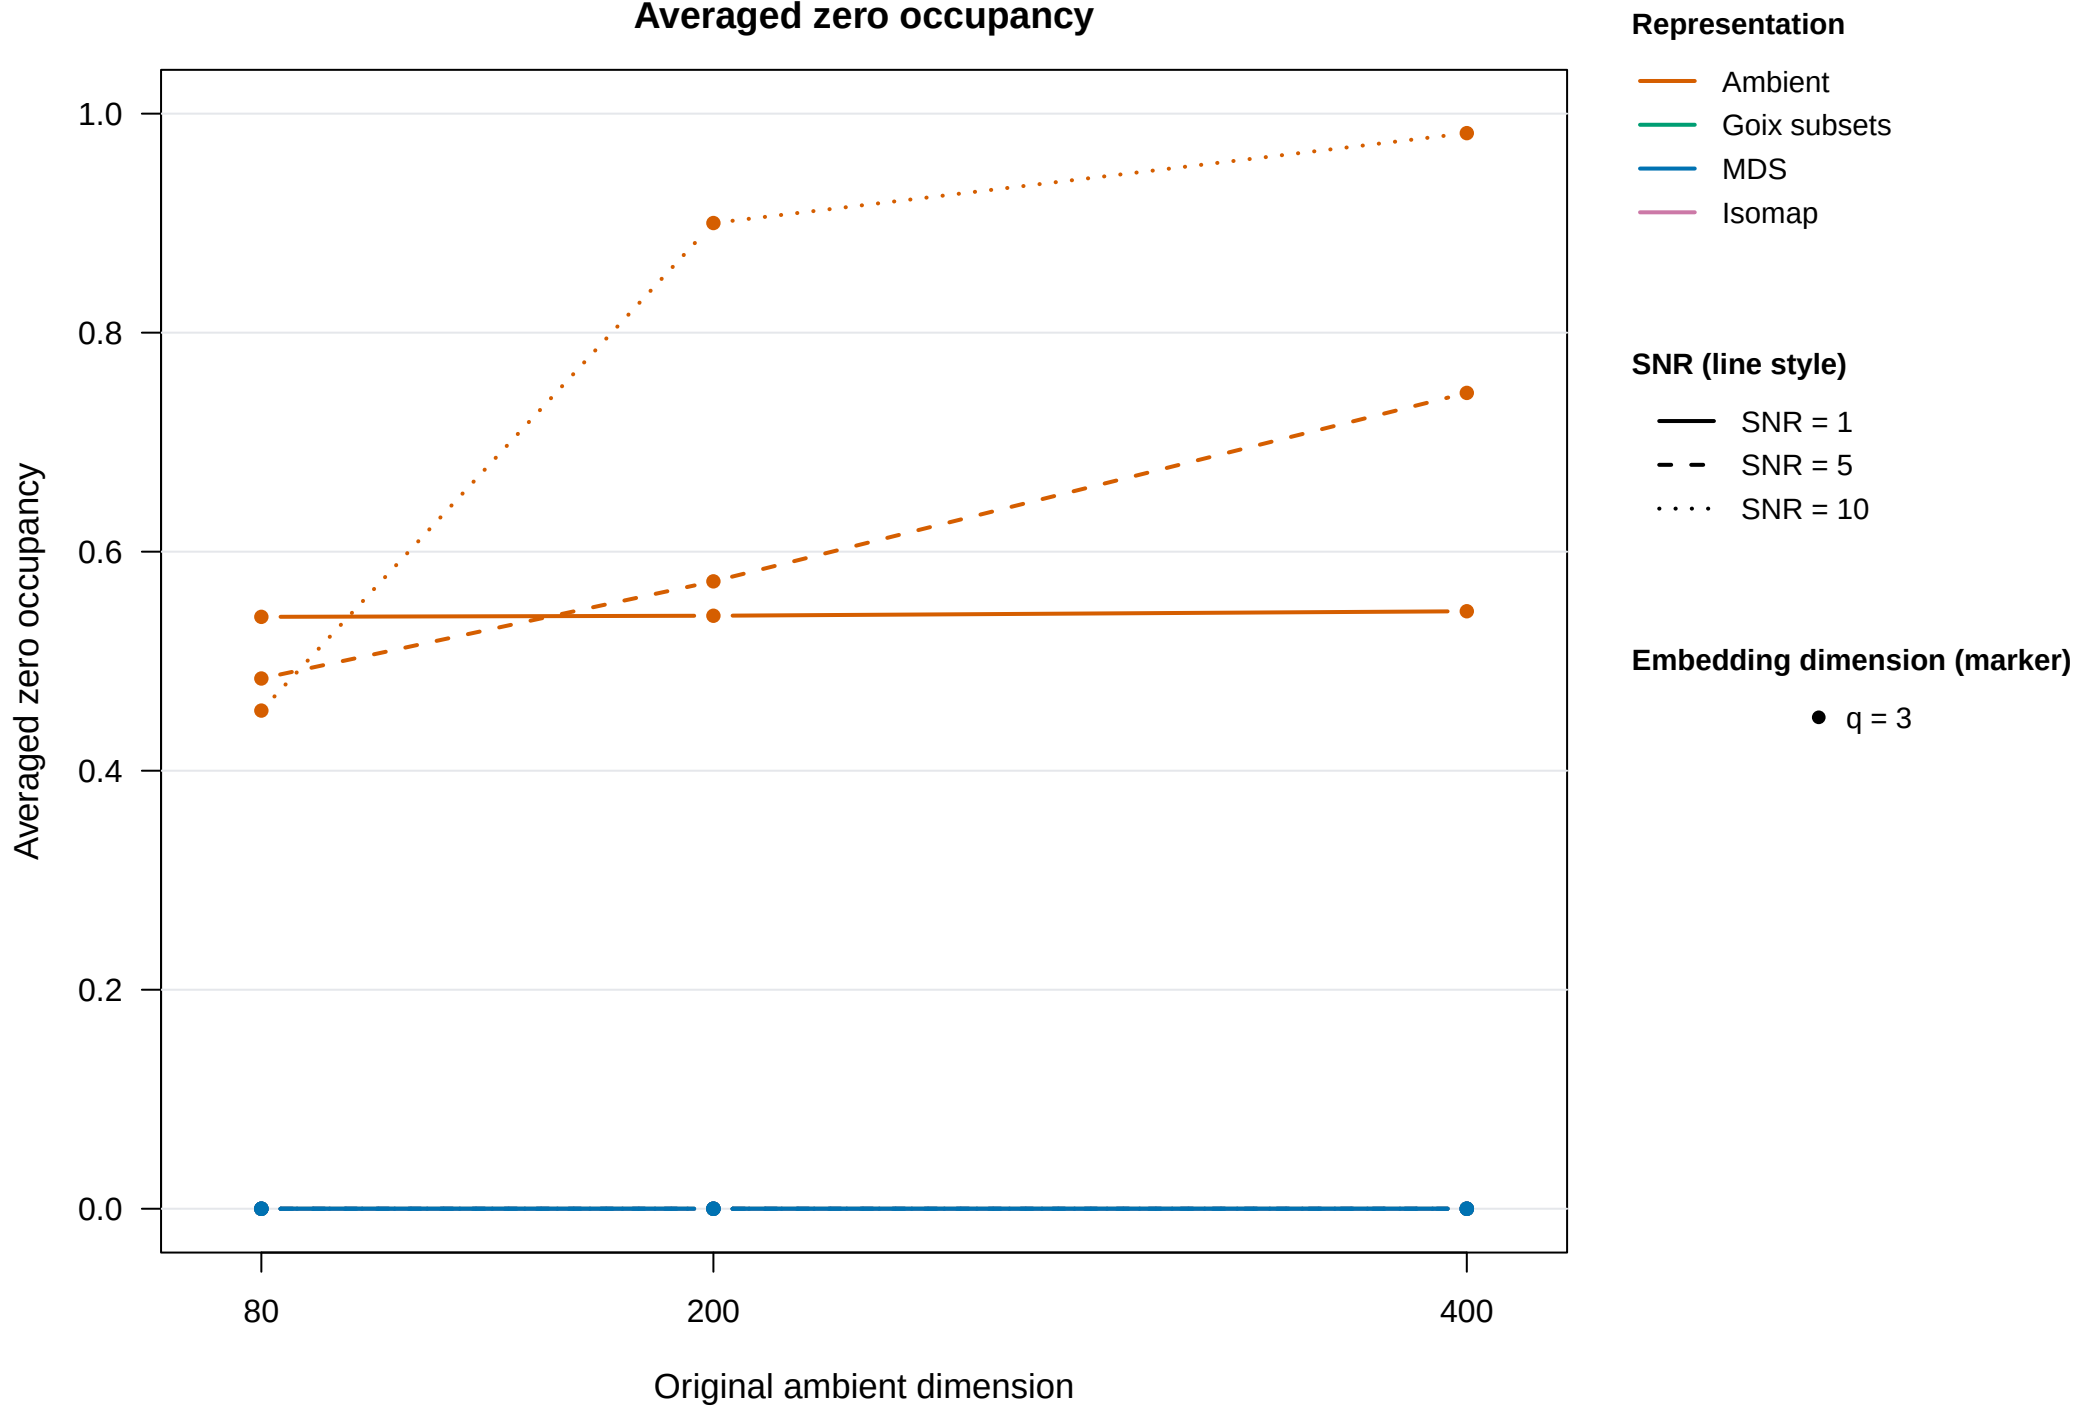

Polynomial | intrinsic dimension = 10  
Averaged embedding OOS stress

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 3

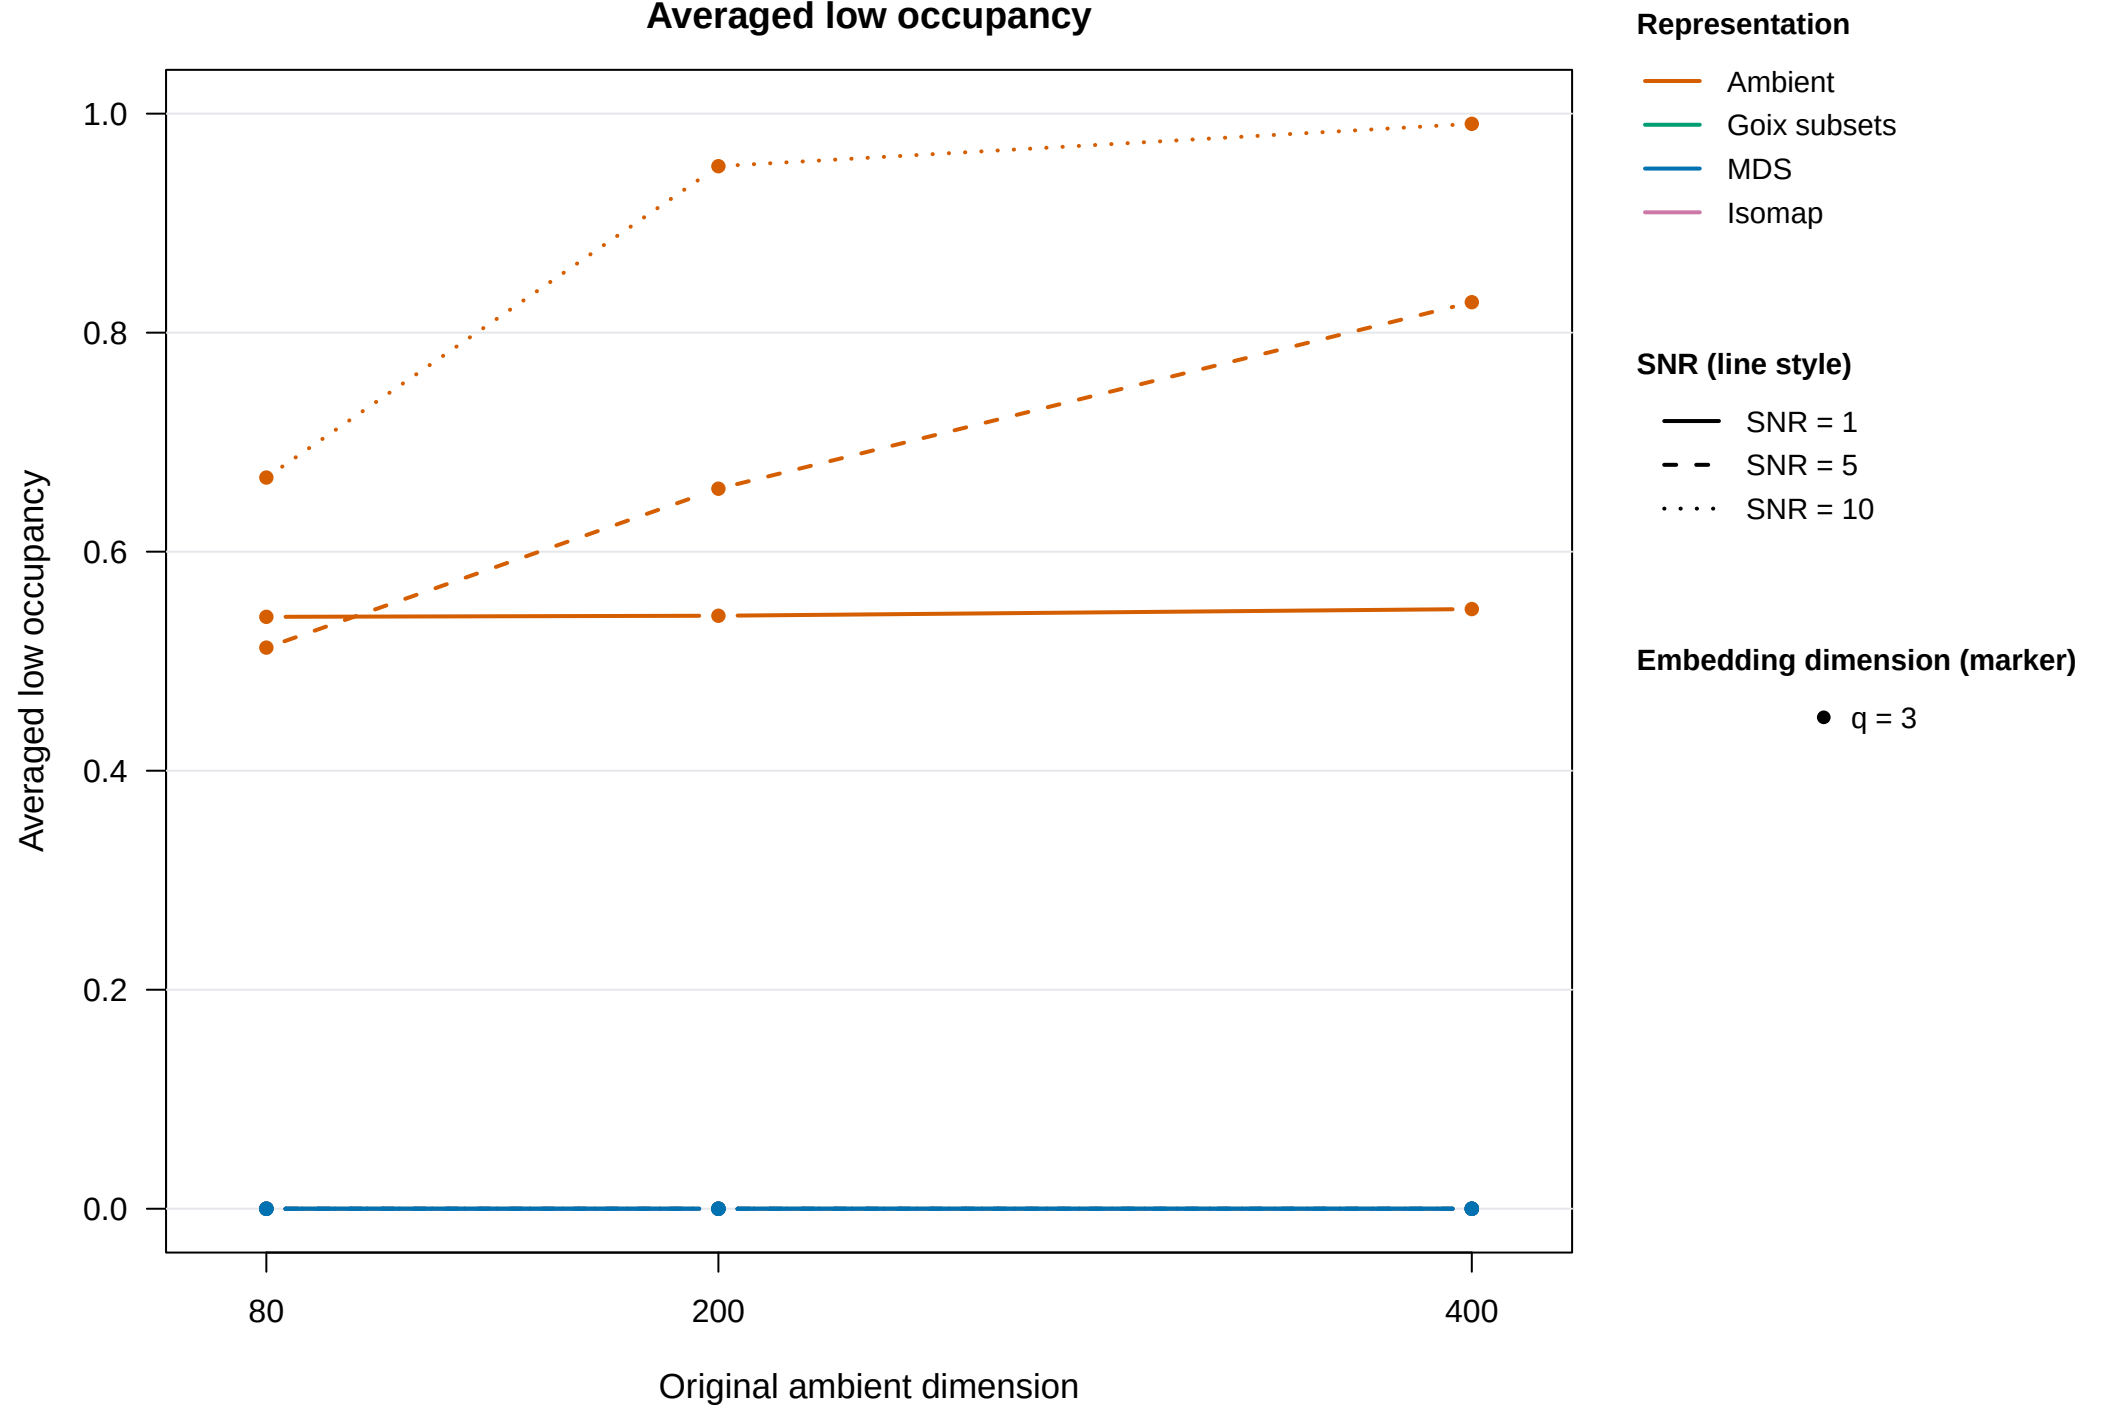

## Averaged zero occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 3

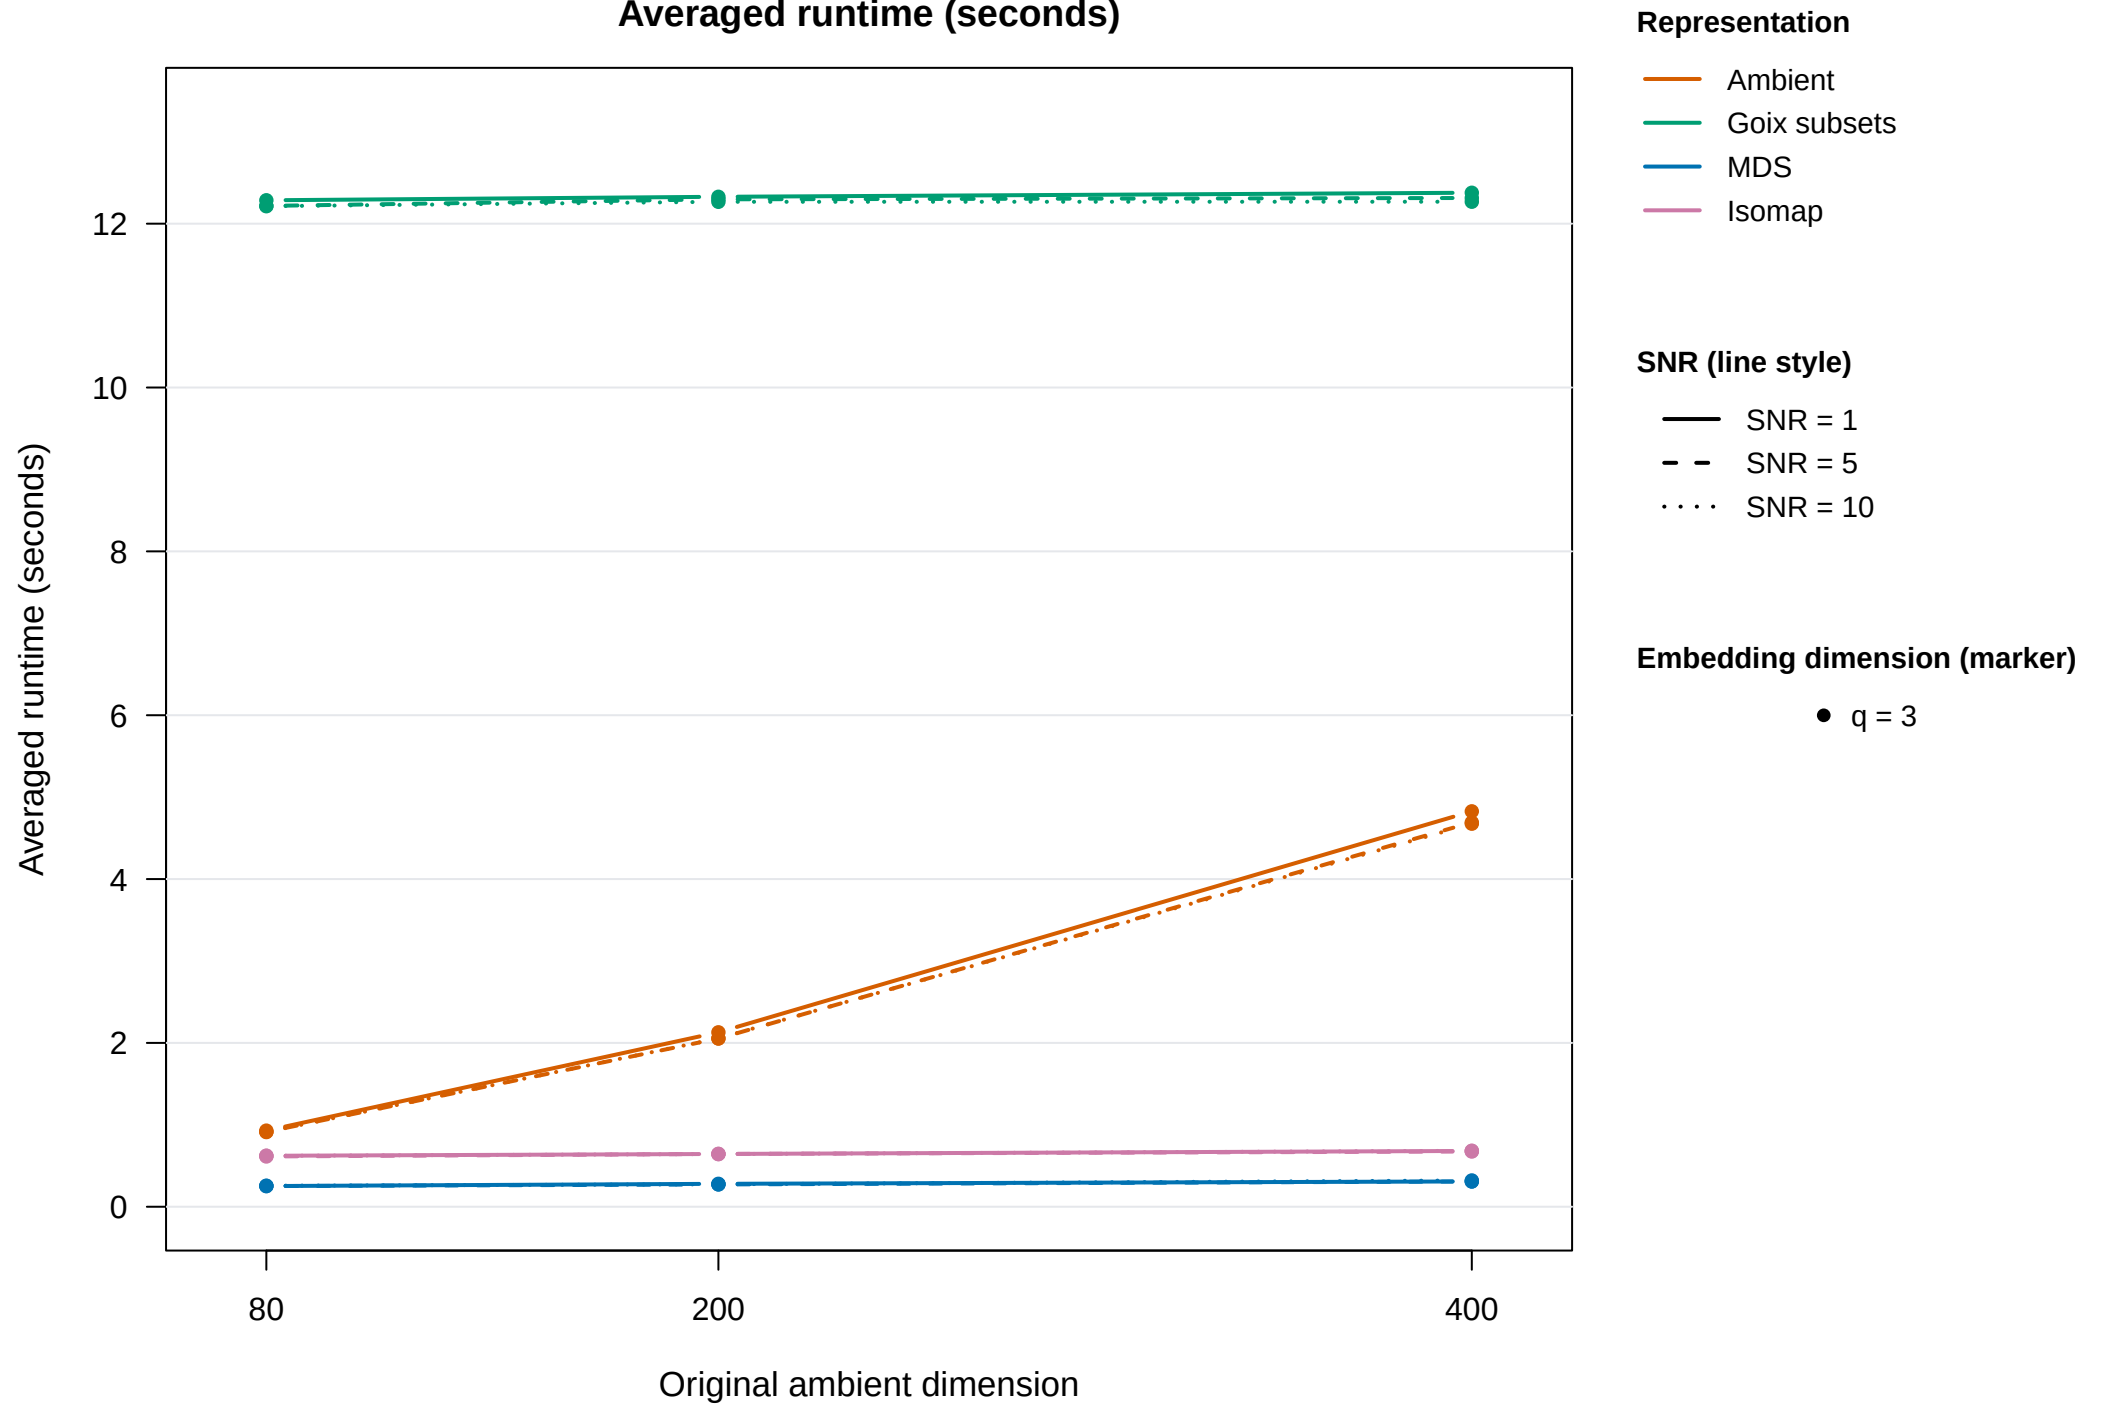

## Averaged low occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 3

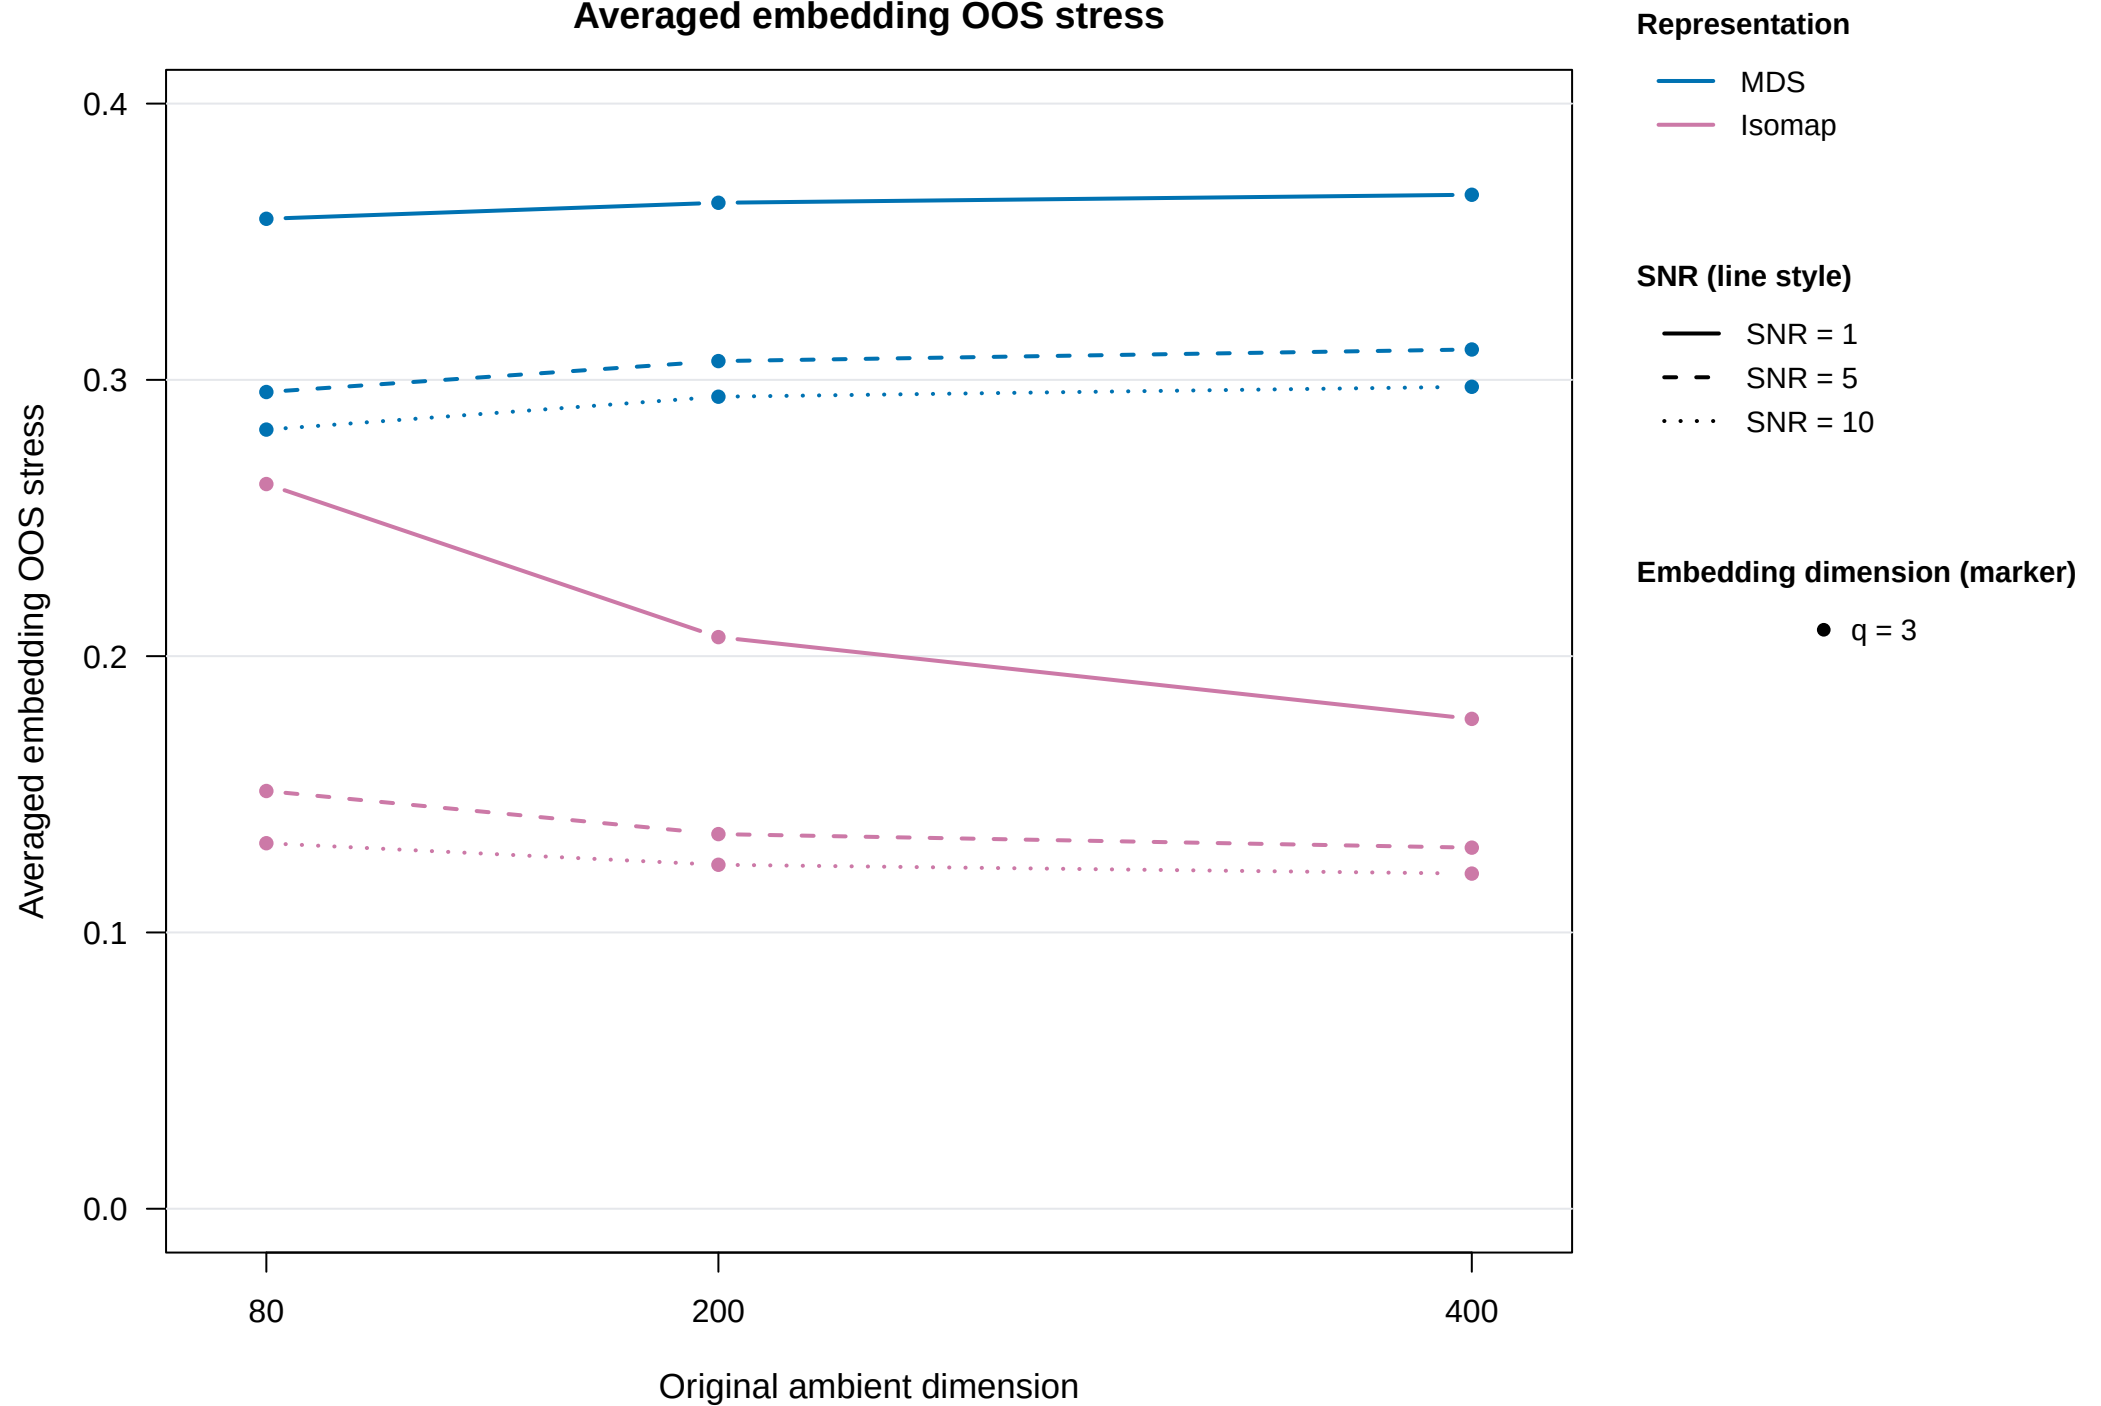

## Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 3

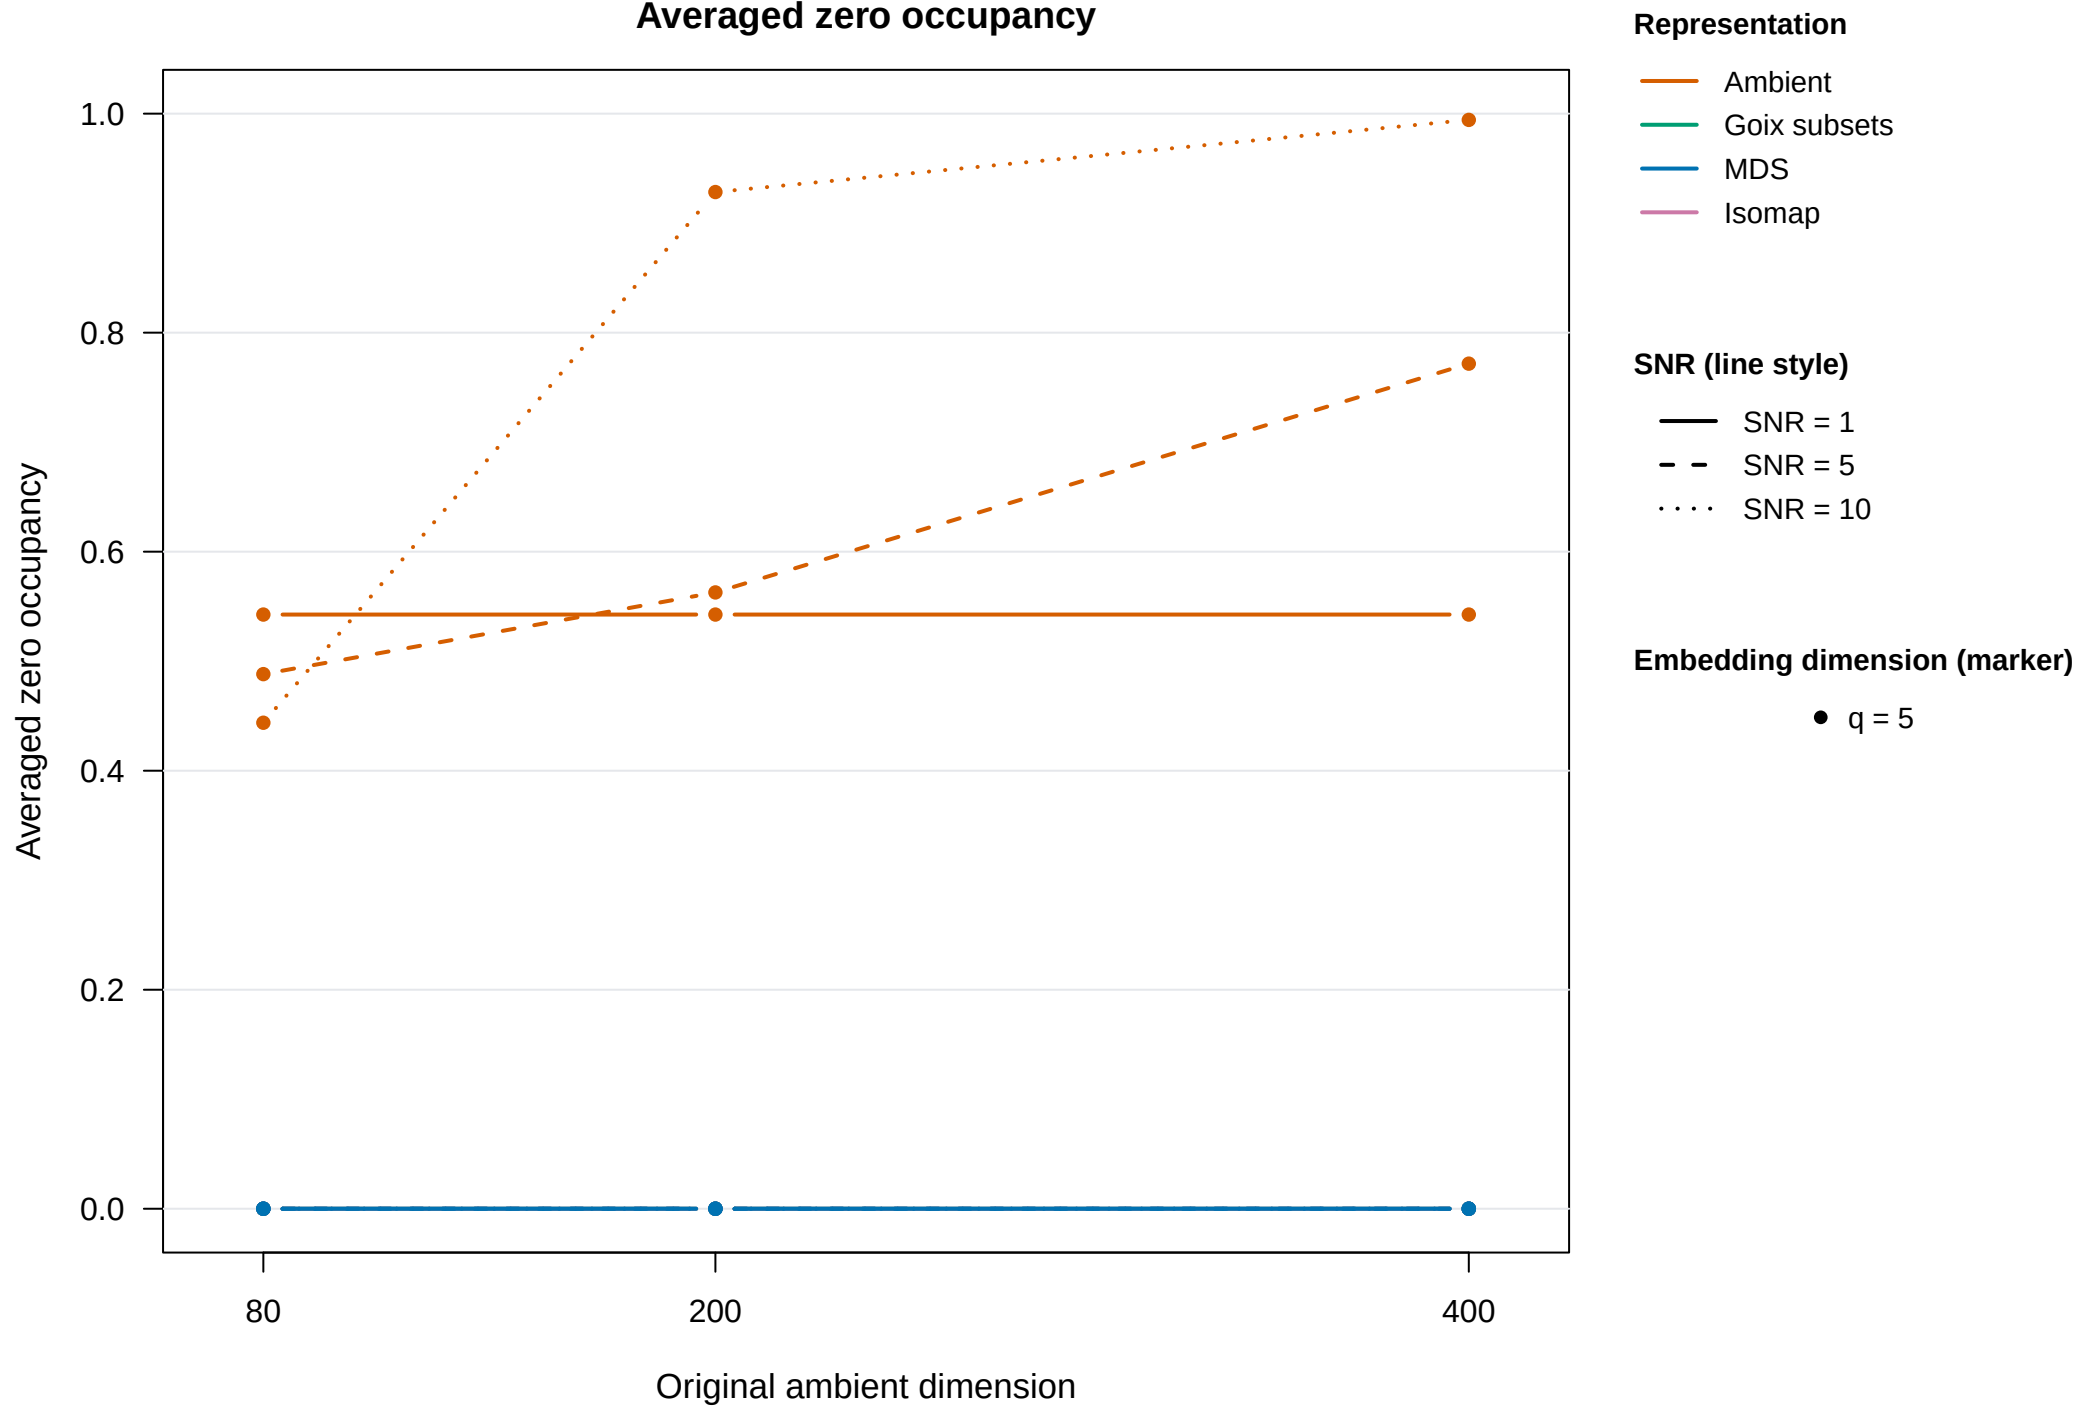

## Averaged embedding OOS stress

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 5

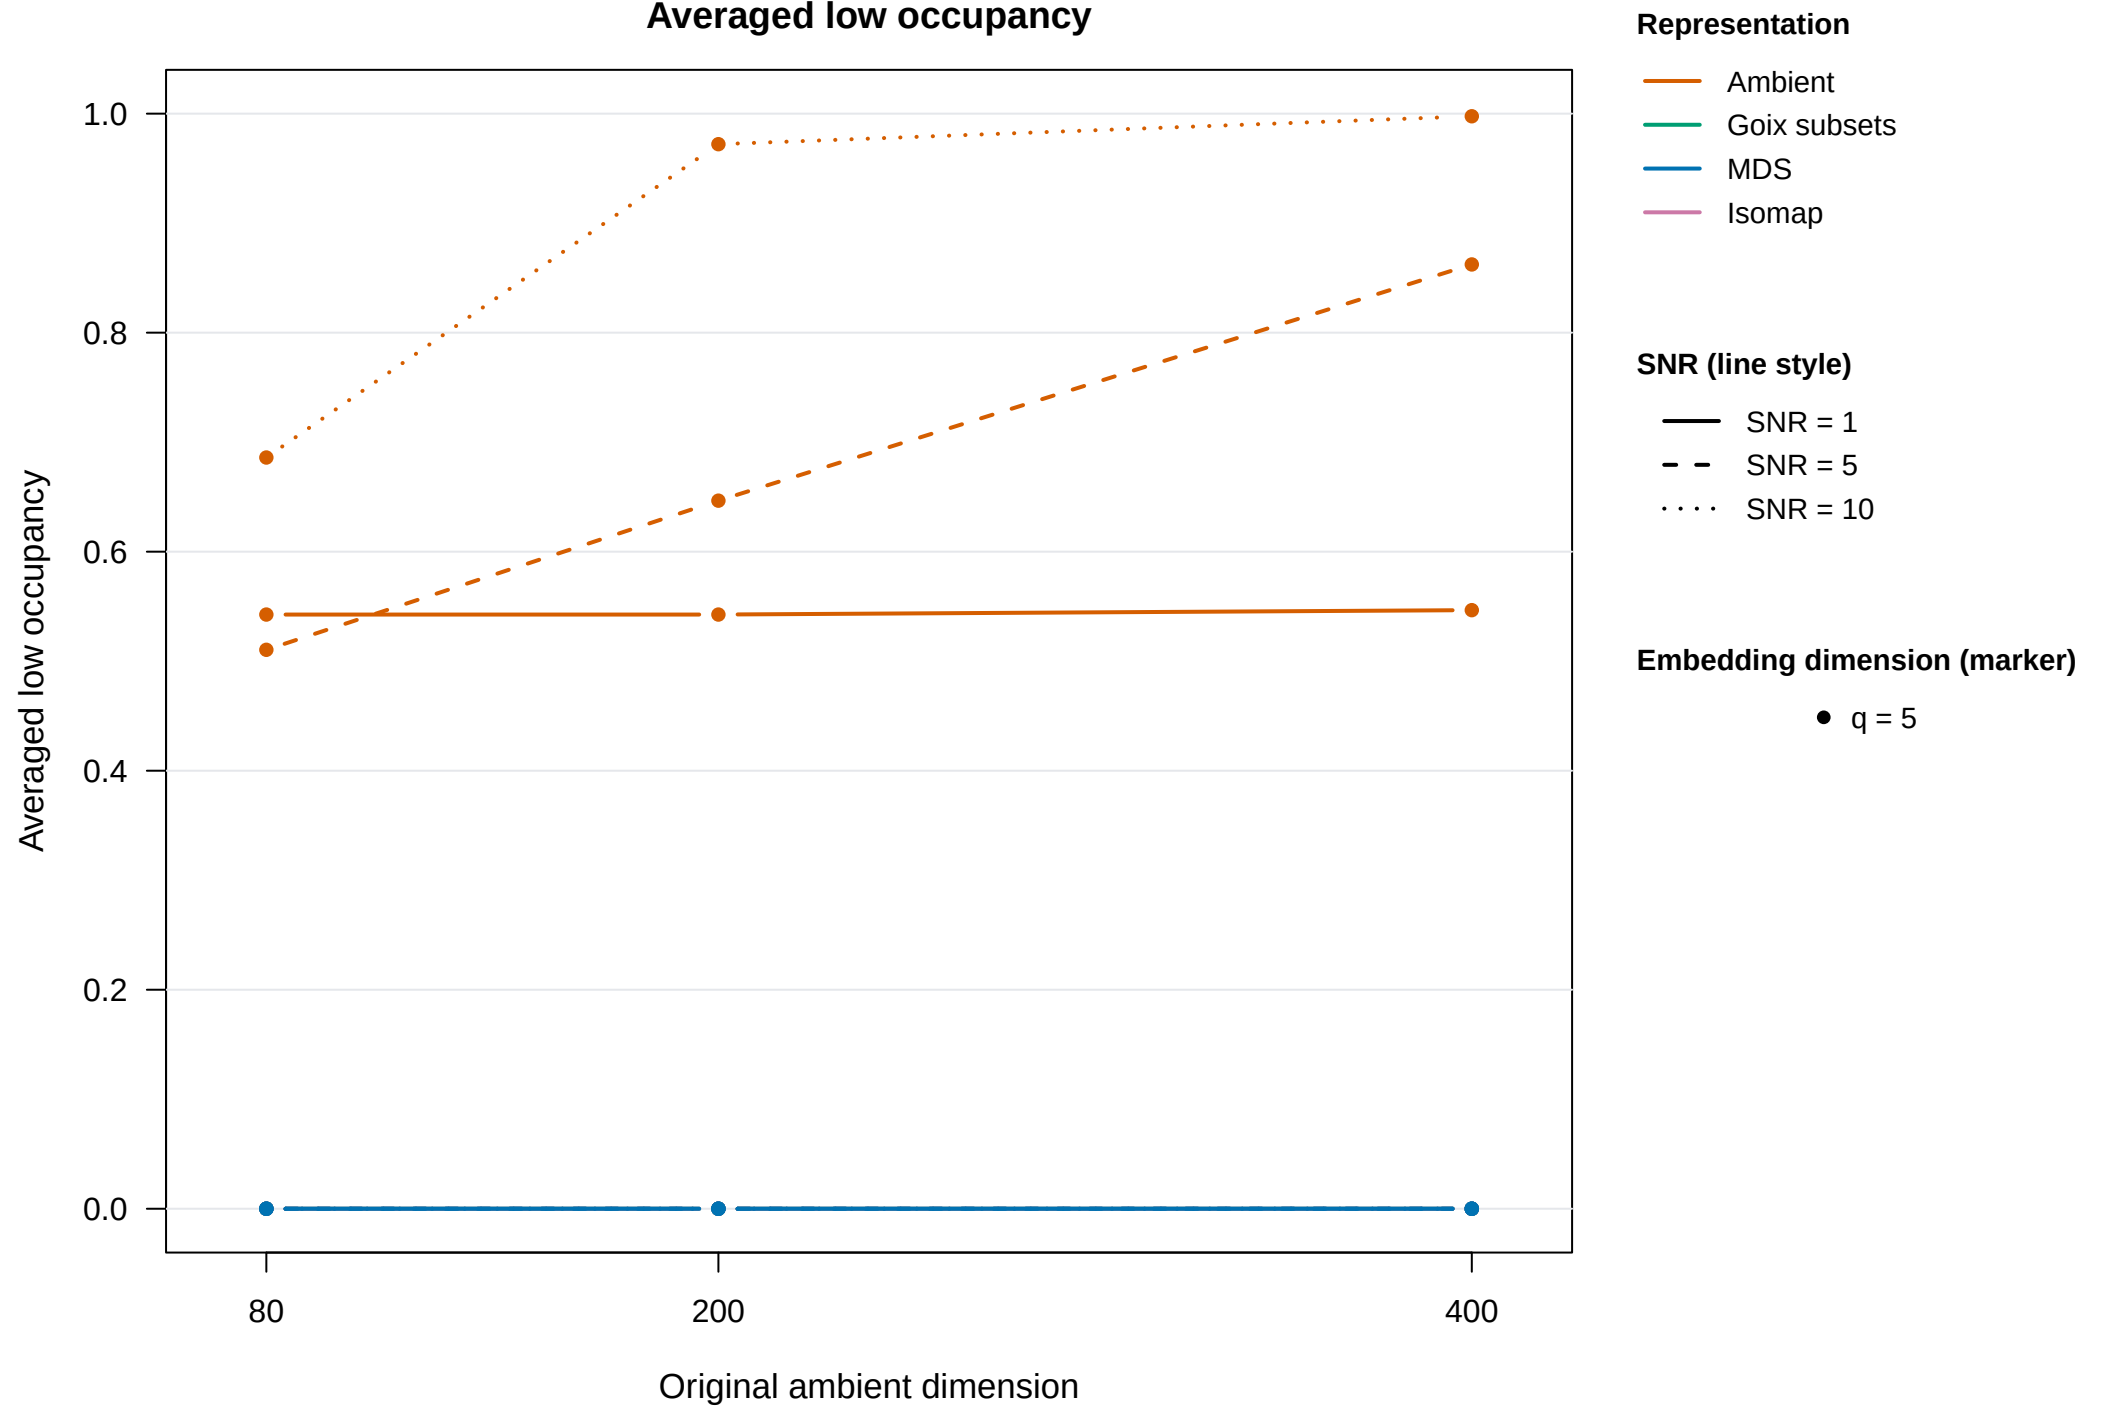

## Averaged zero occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 5

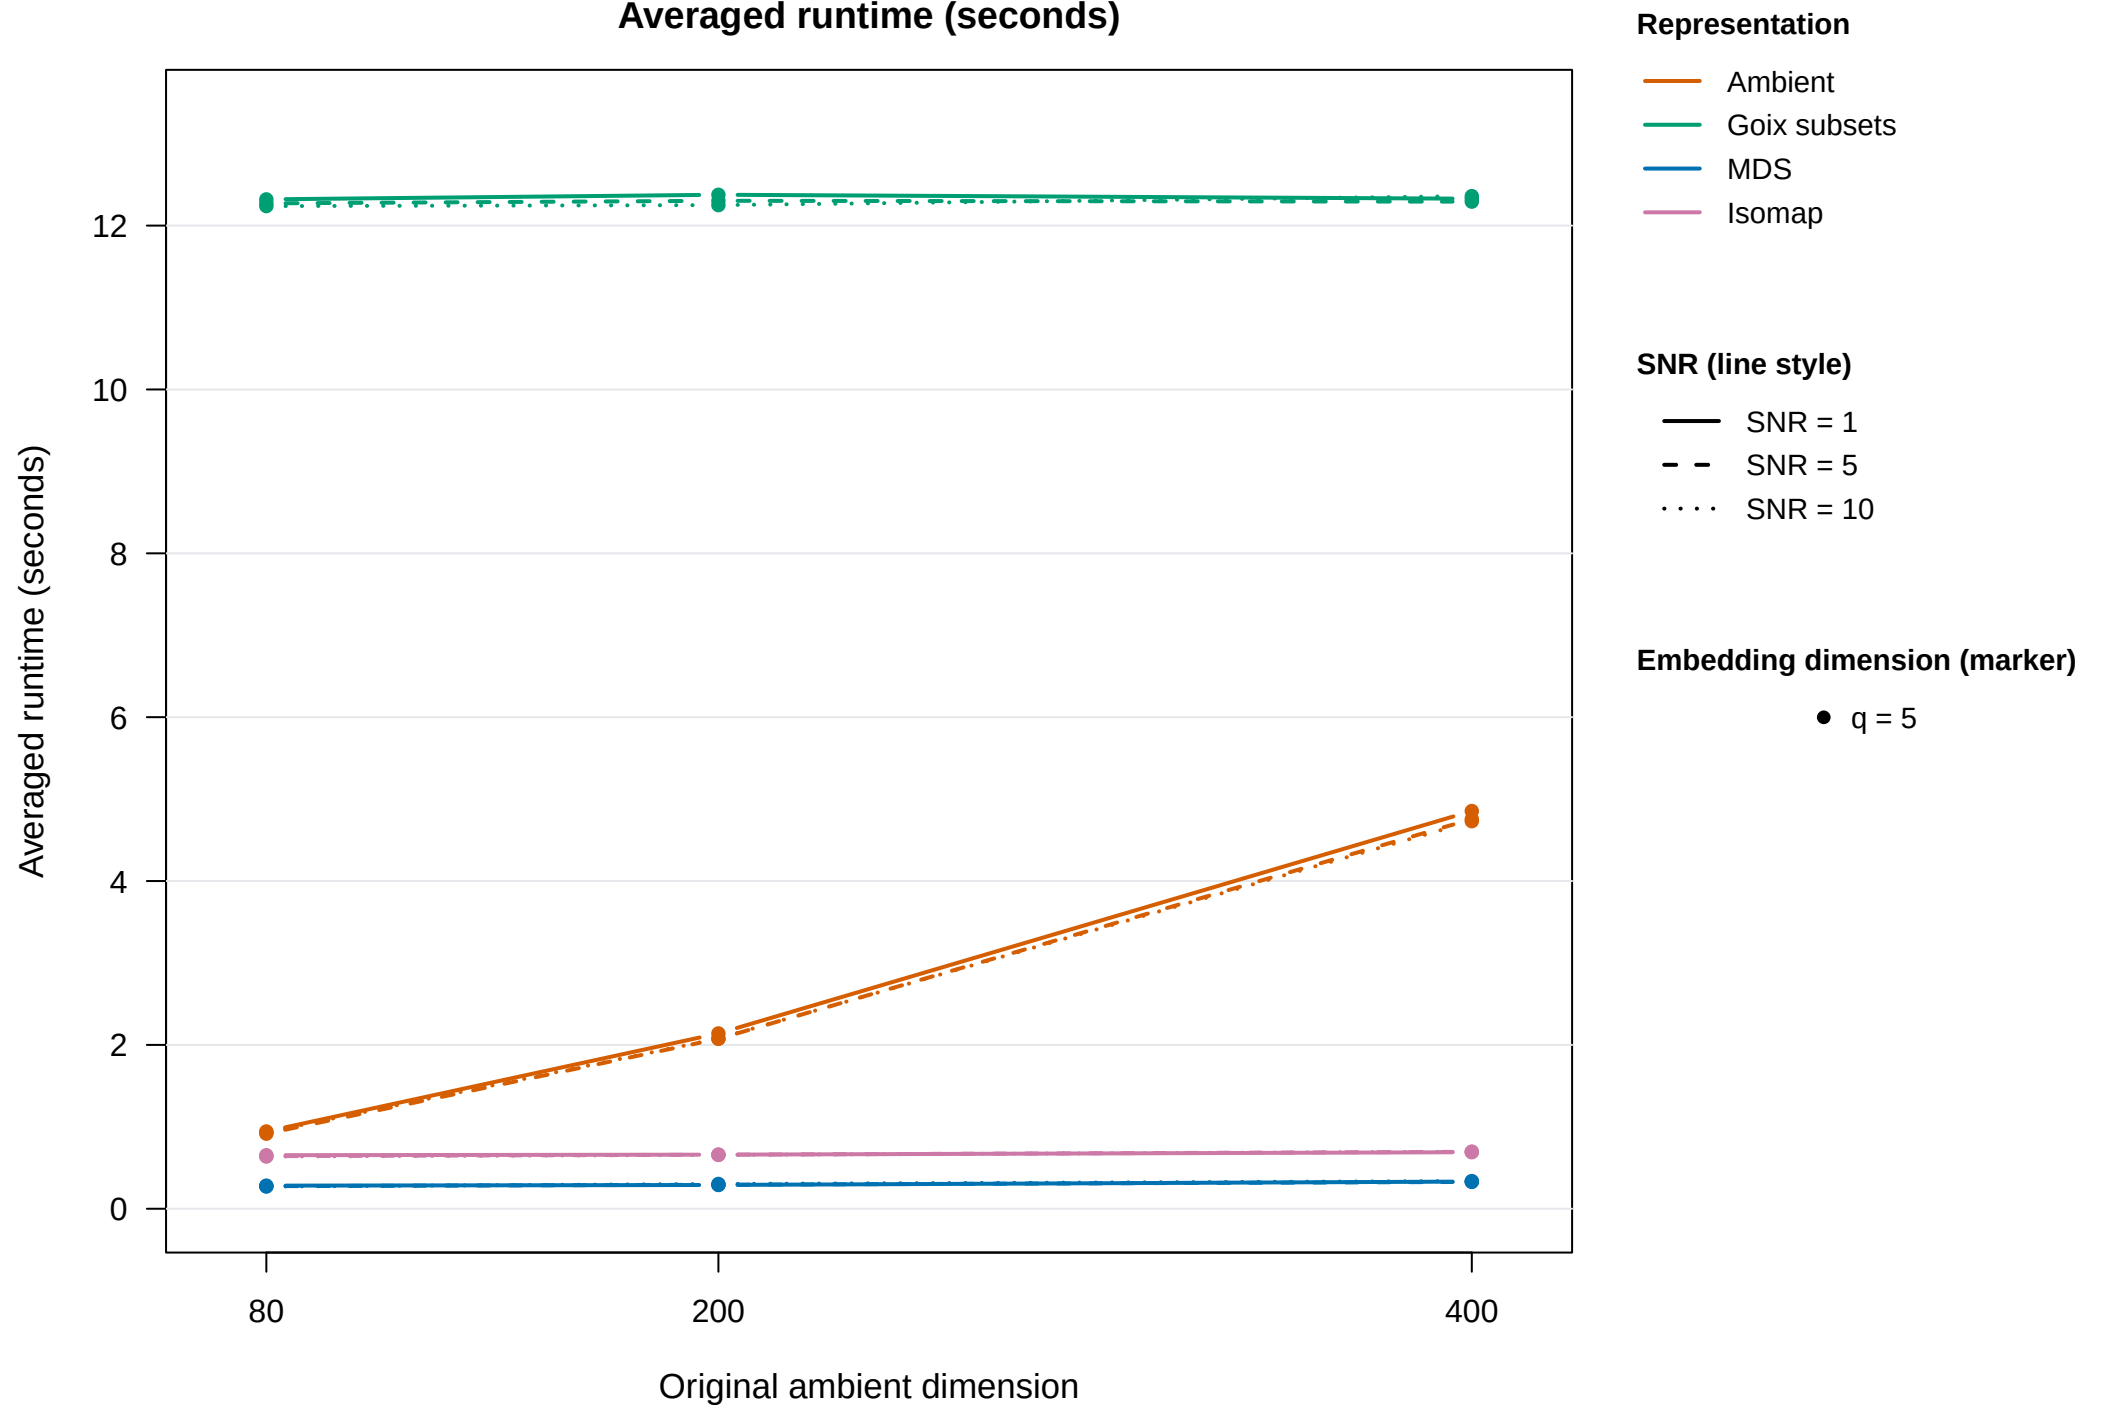

## Averaged low occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 5

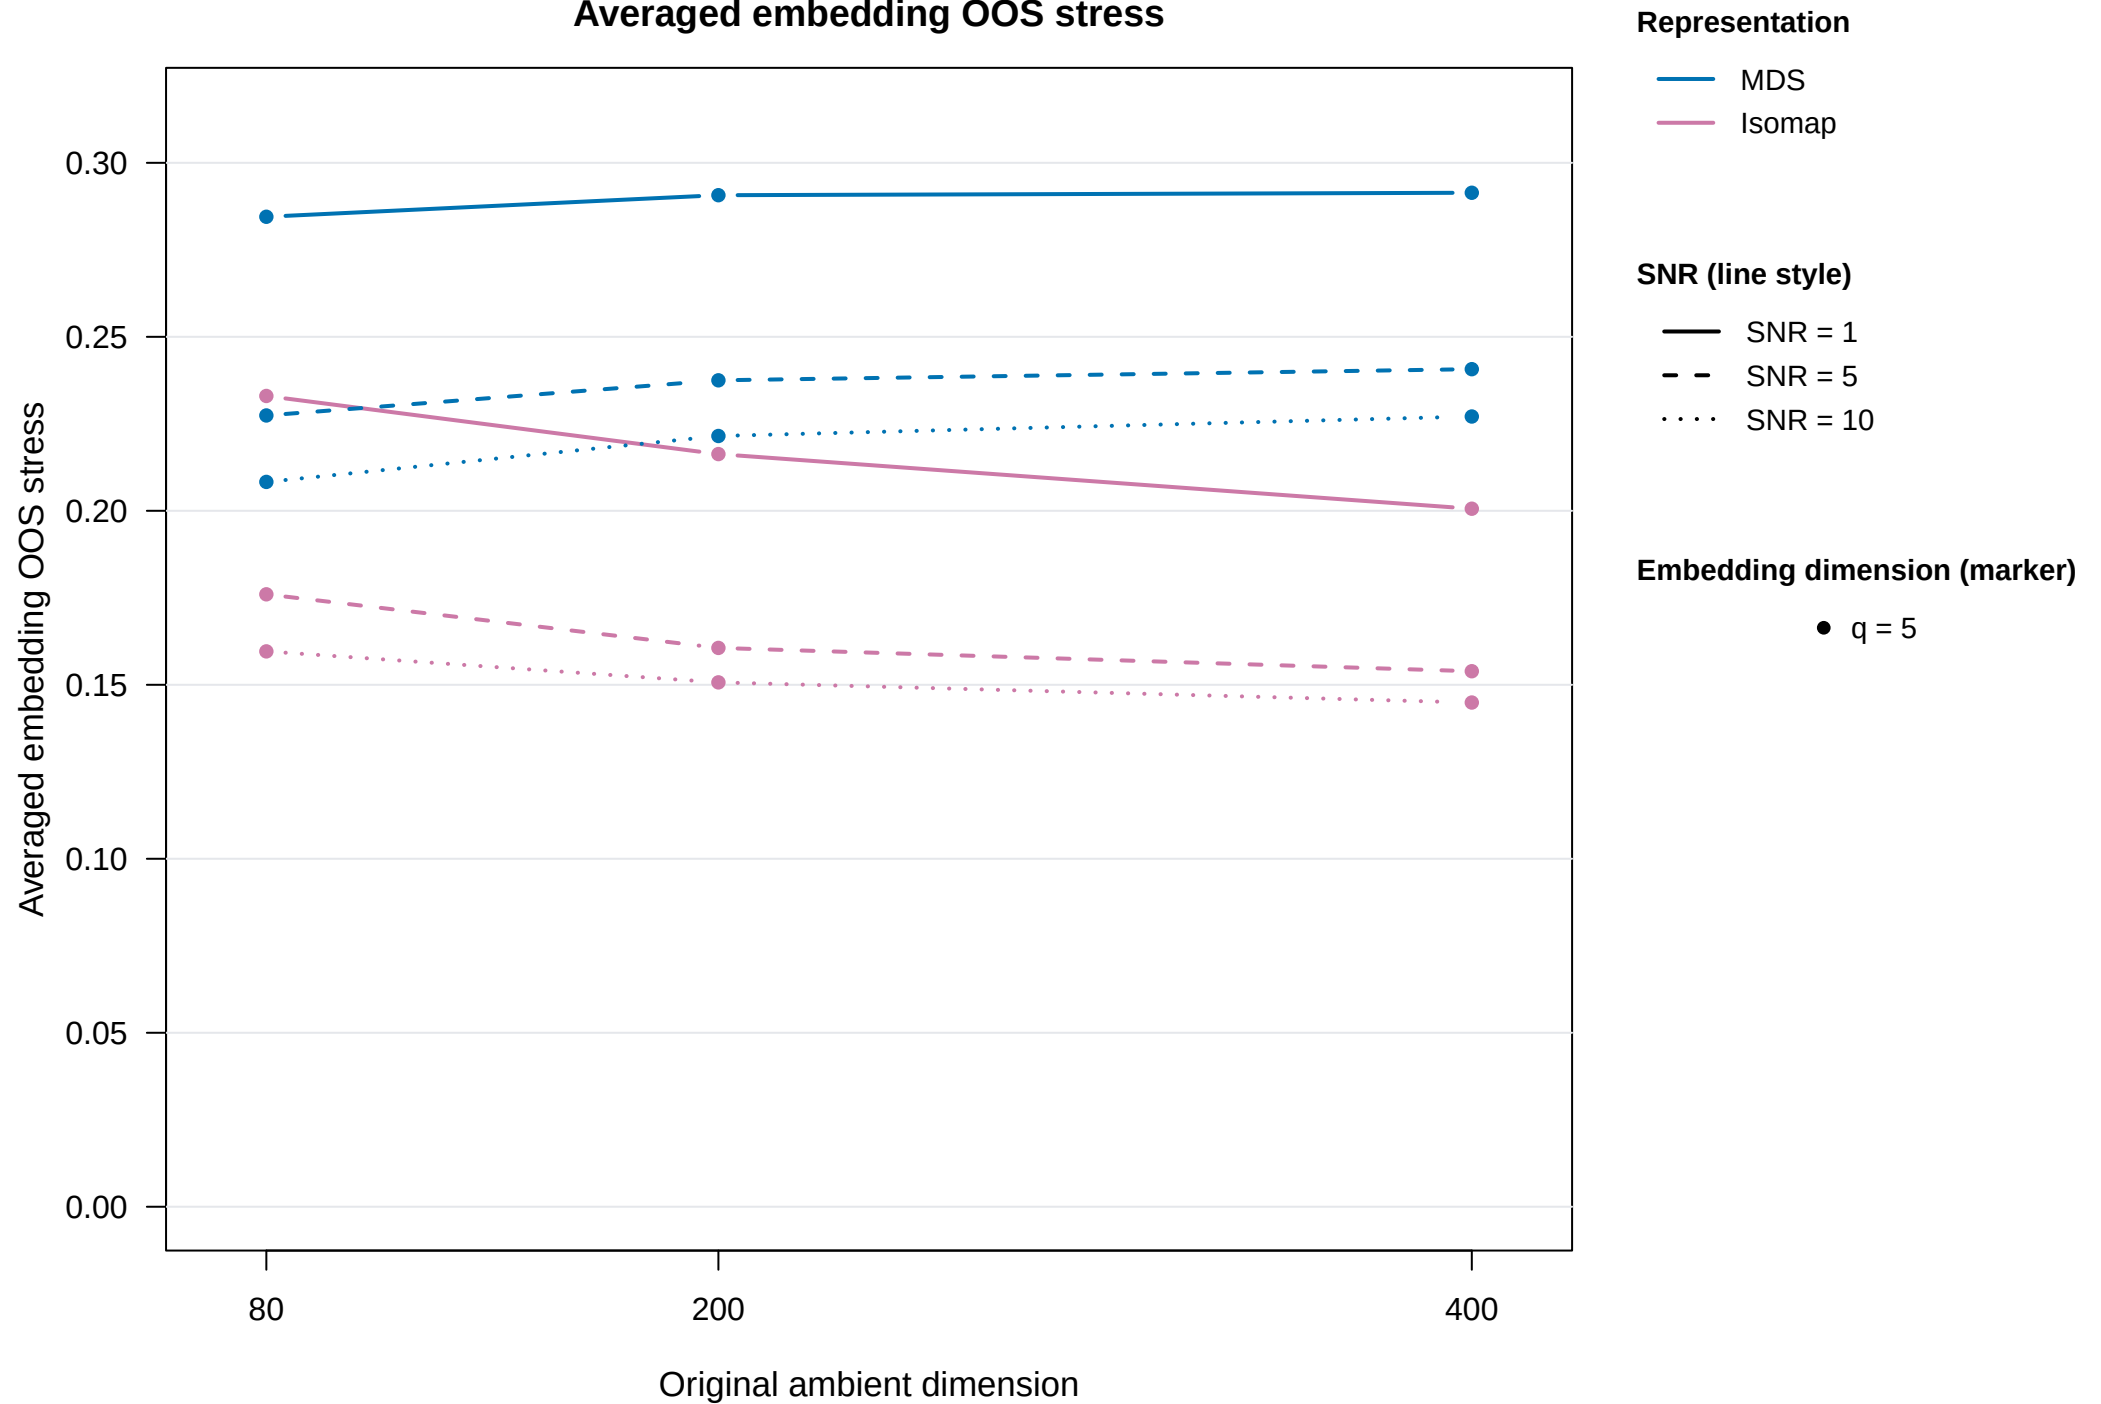

## Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

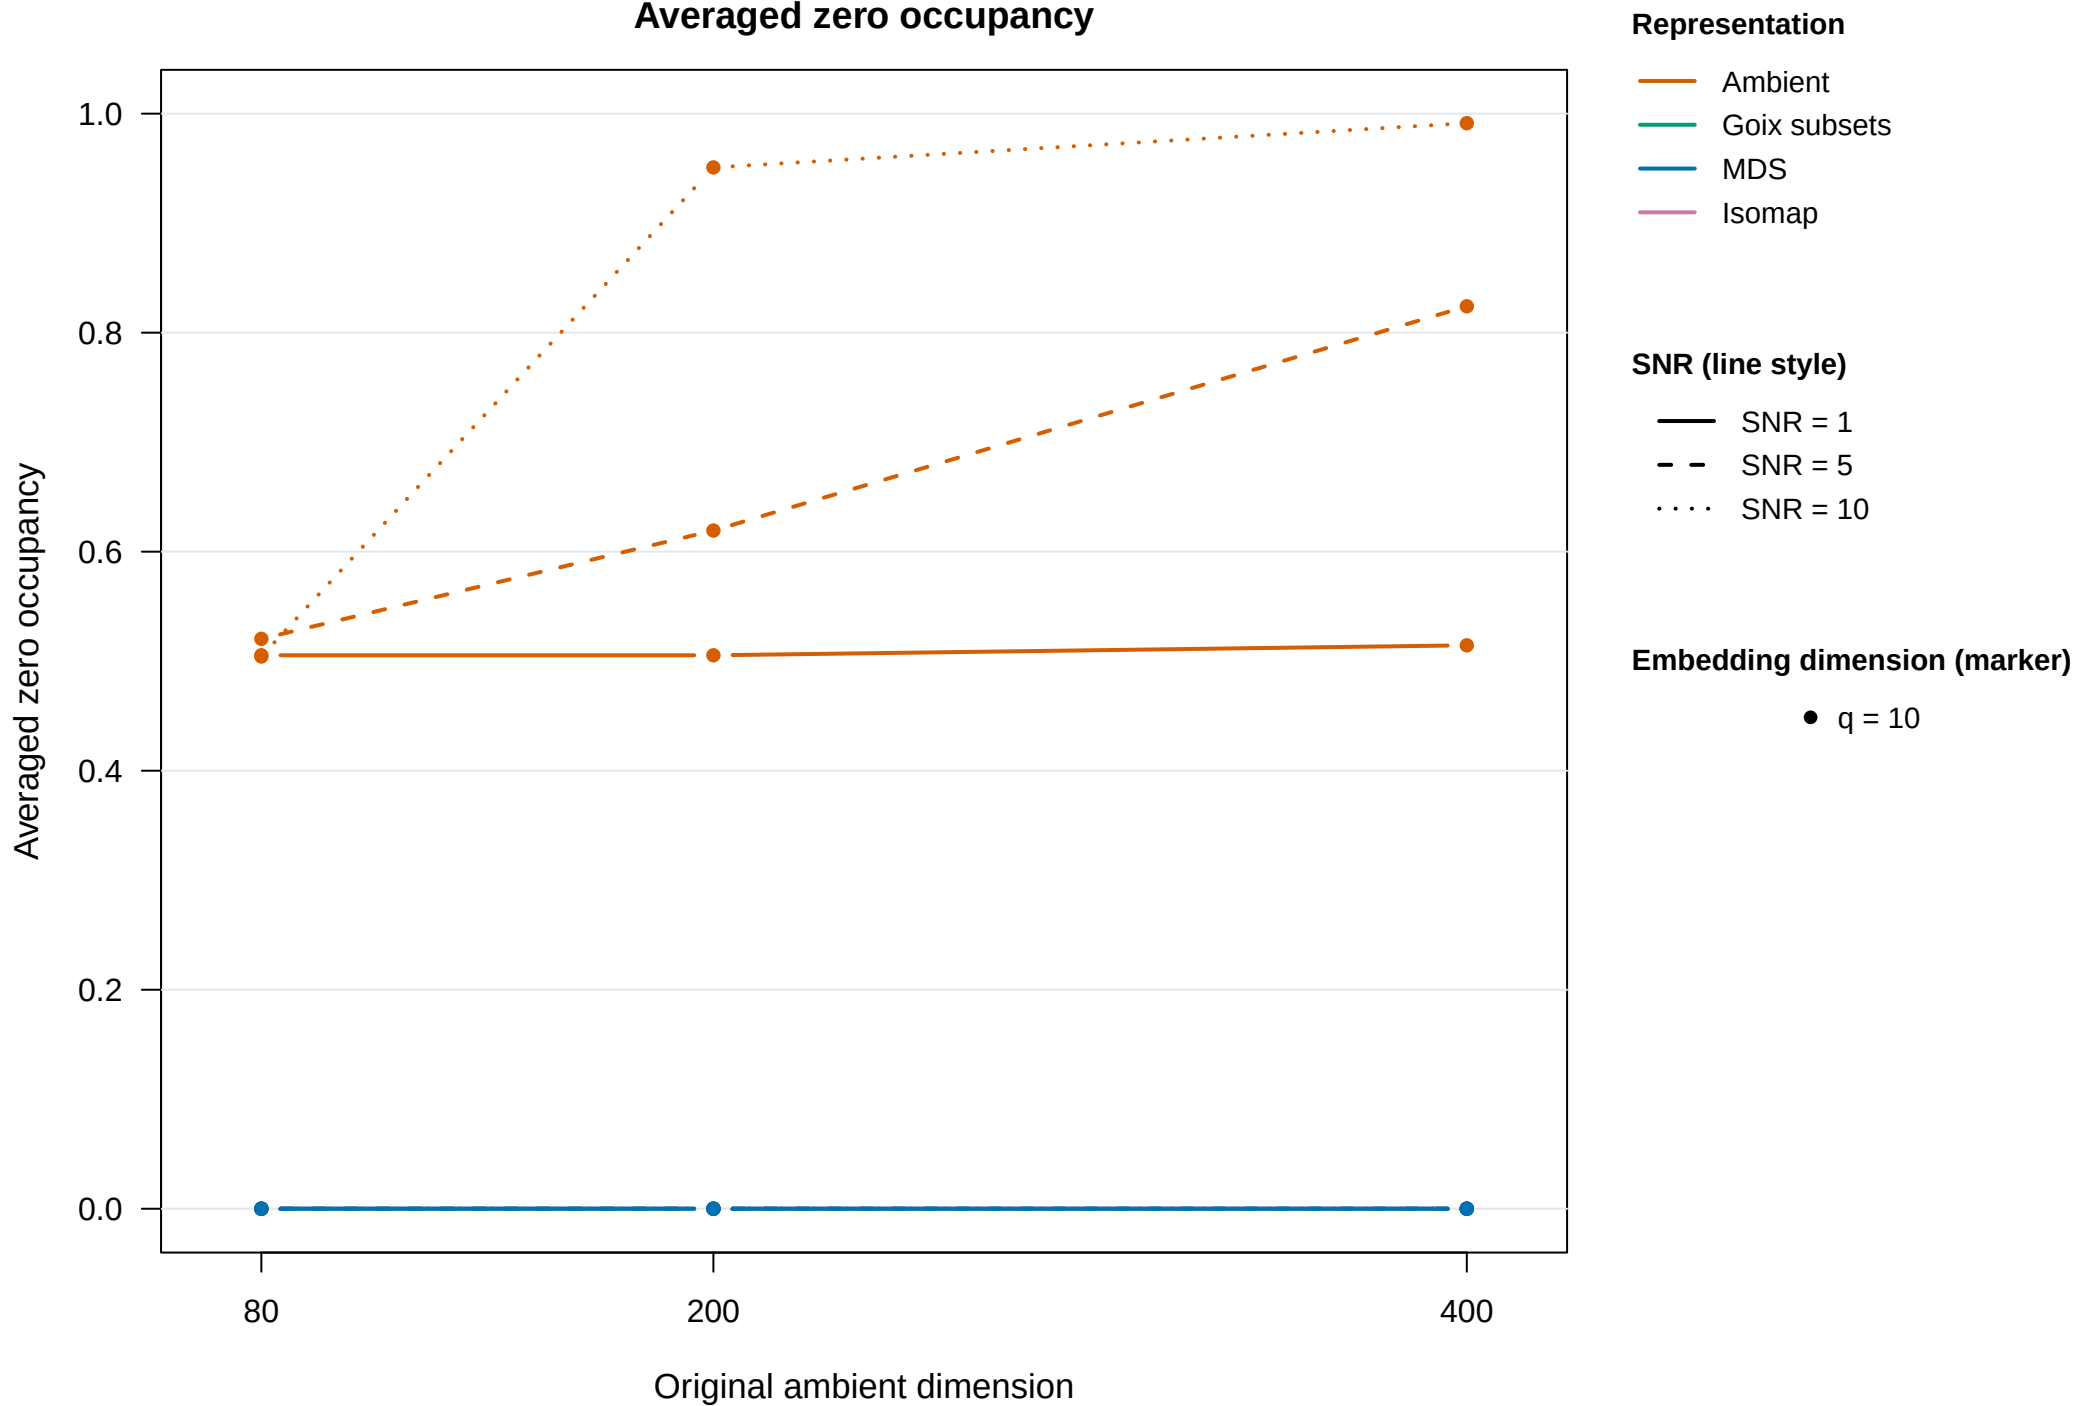

# Oscillatory | intrinsic dimension = 5

## Averaged embedding OOS stress

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

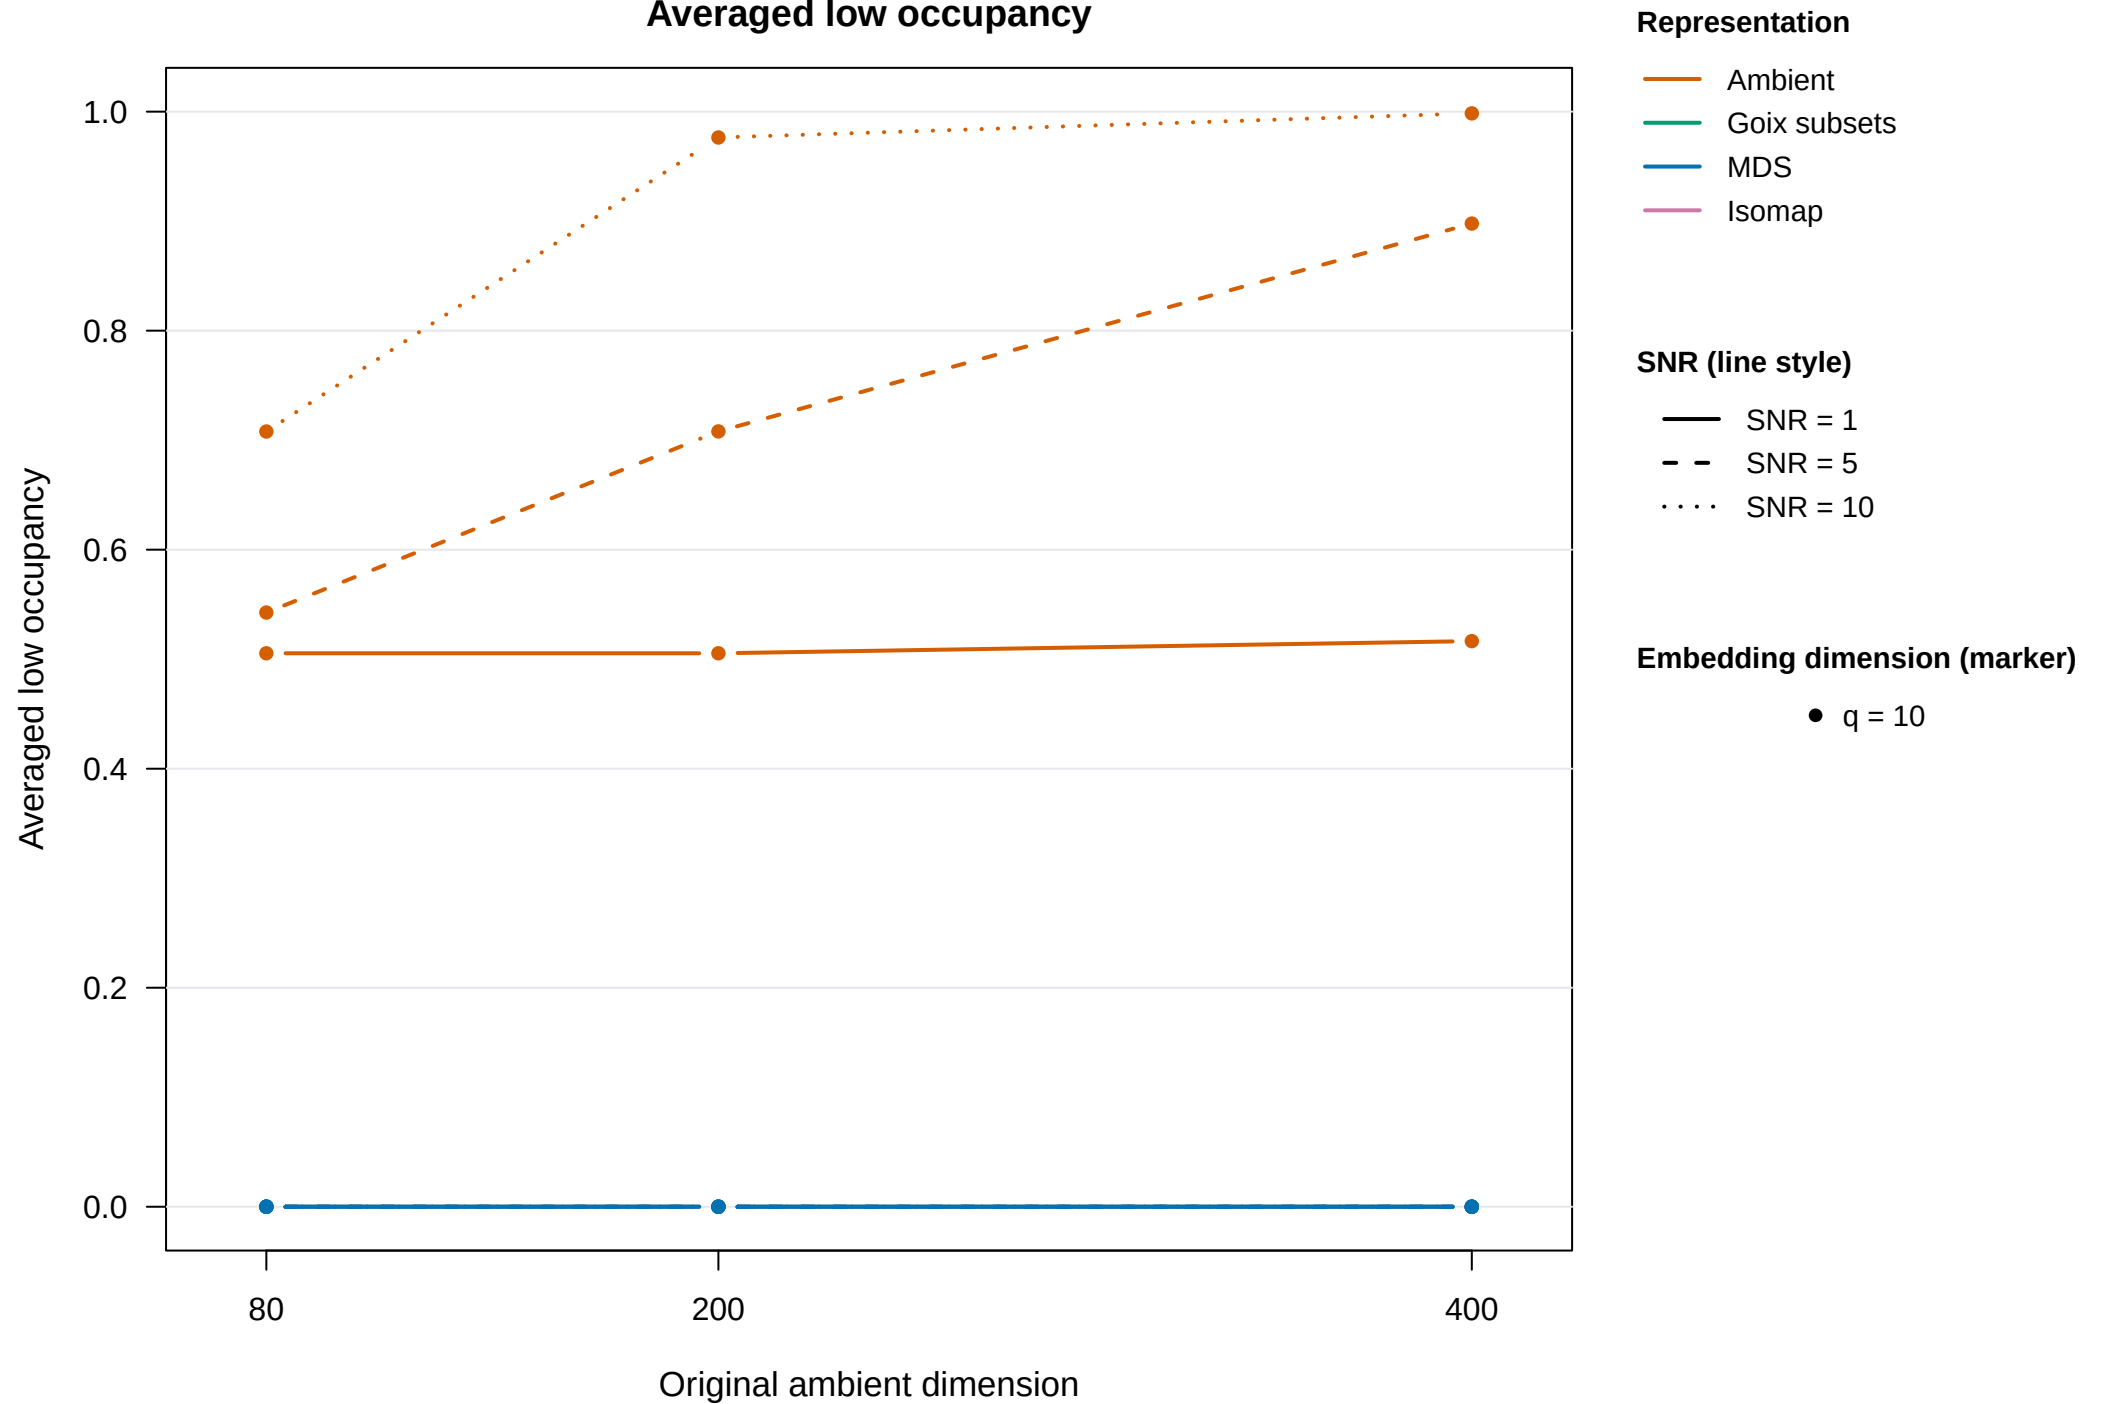

Oscillatory | intrinsic dimension = 10  
Averaged zero occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 10

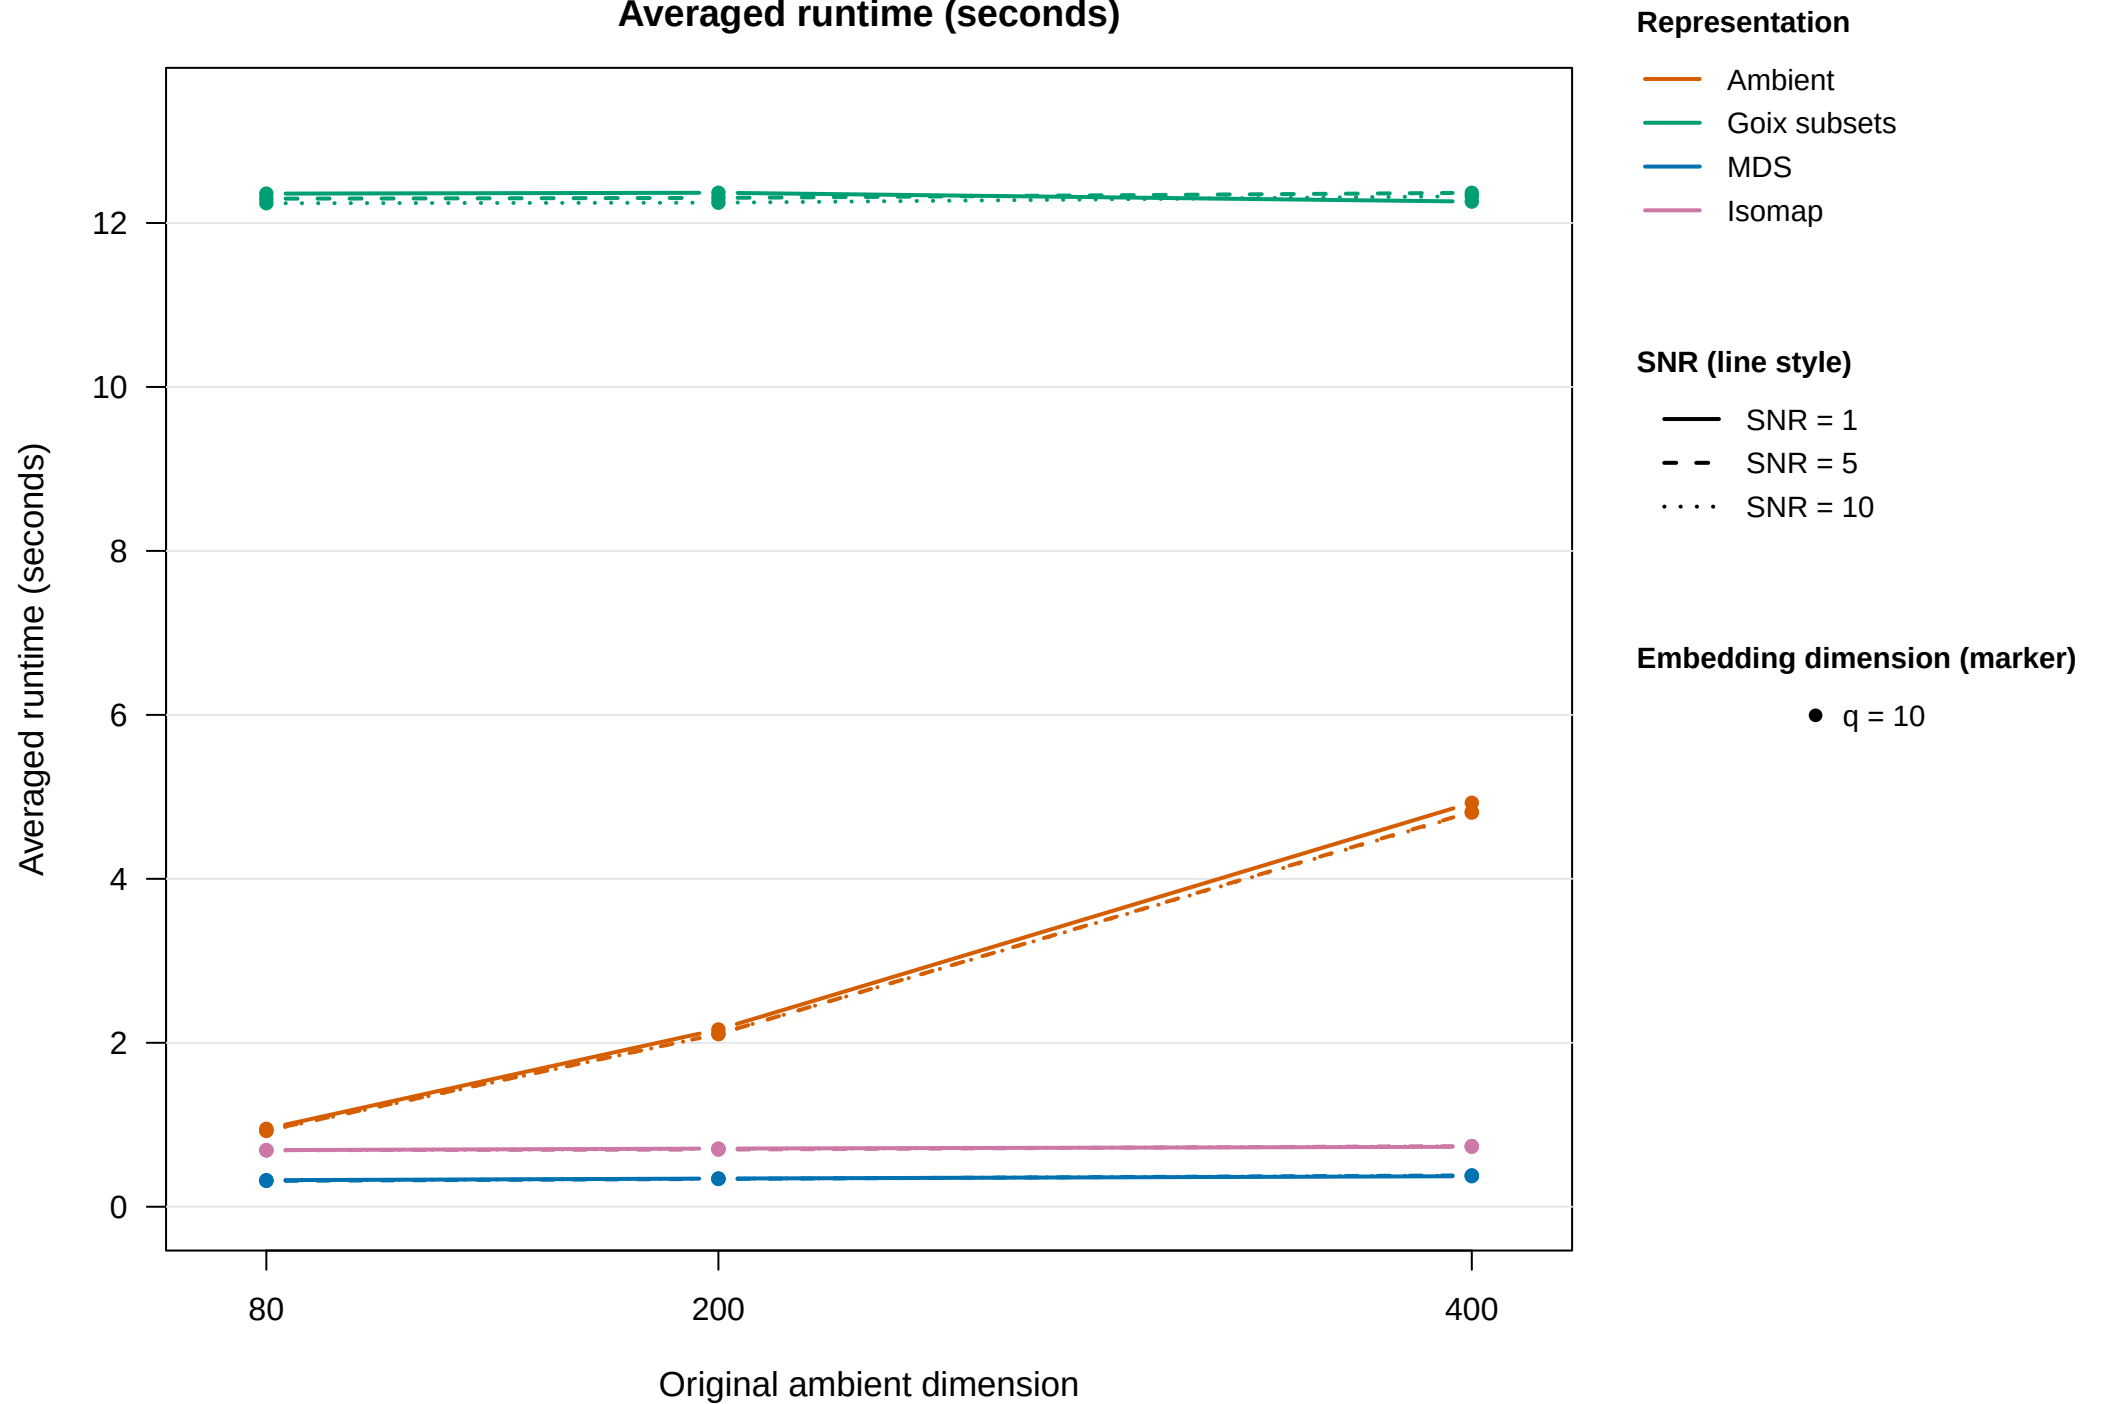

## Averaged low occupancy

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 10

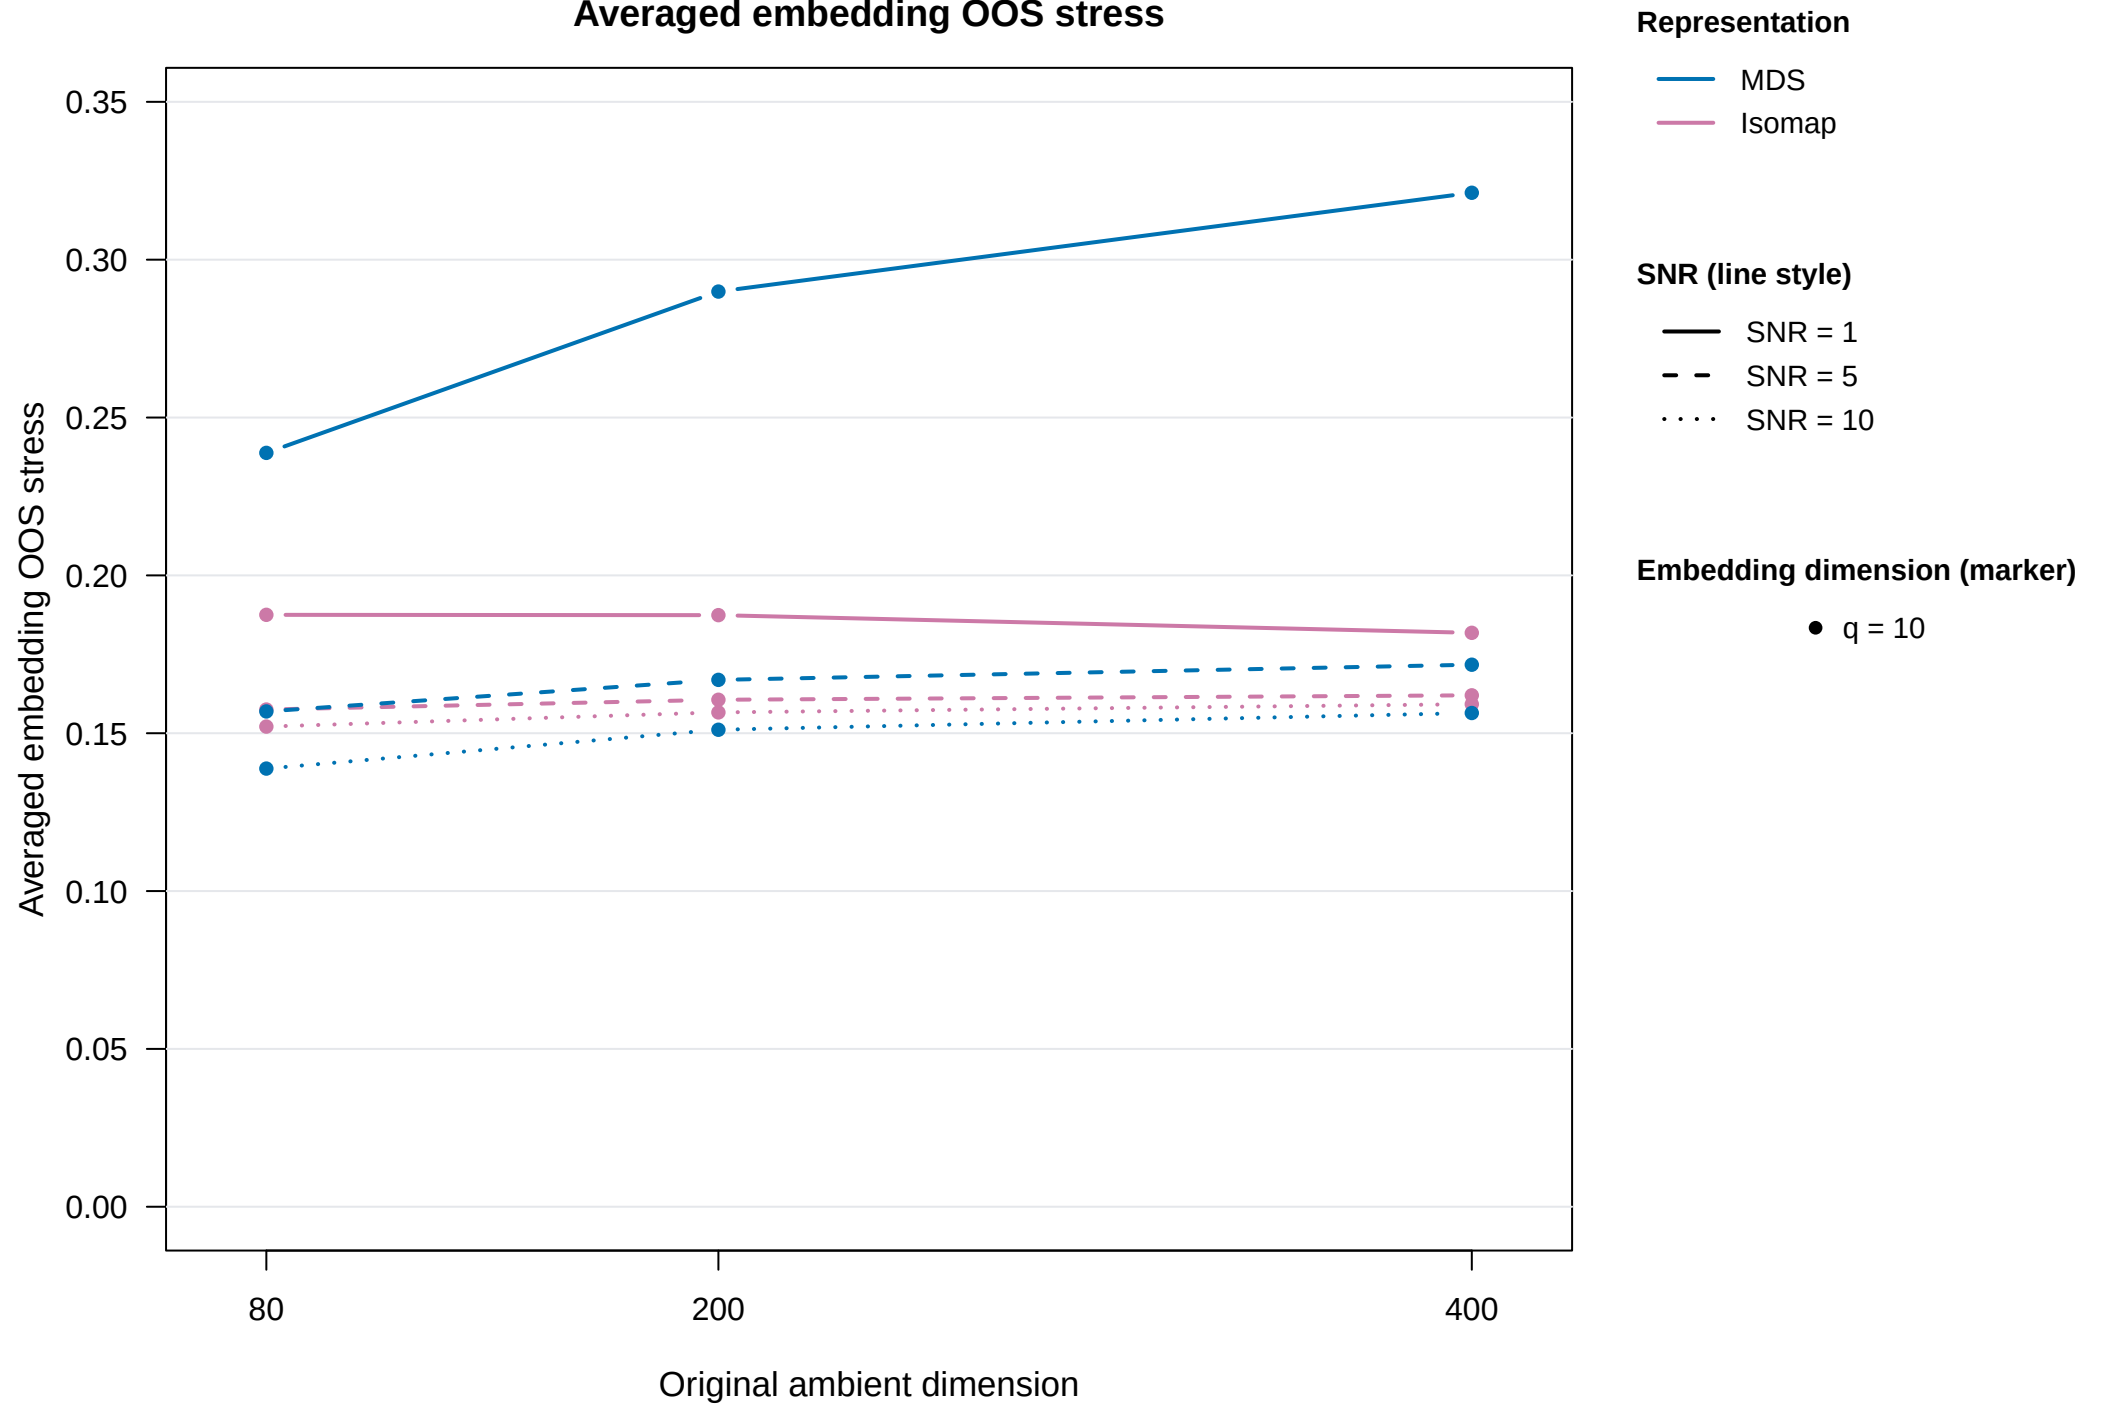

## Averaged runtime (seconds)

Each point is a group mean. A line identifies representation, embedding dimension and SNR.

# Oscillatory | intrinsic dimension = 10

## Averaged embedding OOS stress

Each point is a group mean. A line identifies representation, embedding dimension and SNR.
